RE: Nine Mile Point Unit 1
 Docket No. 50-220
 DPR-63

Gentlemen:

Niagara Mohawk Power Corporation's (NMPC) letter dated October 21, 1997 (NMP1L 1257), submitted proposed changes to the Technical Specifications set forth in Appendix A to the above mentioned license. The proposed changes involve senior reactor operator license requirements for the Manager Operations and the General Supervisor Operations, as well as minimum education requirements for the Manager Operations. Attachment A to this letter submits a revised page 349 to replace the previously submitted revised page 349 that was contained within Attachment A of the October 21, 1997 submittal. Attachment B to this letter provides a marked-up copy of the revised page 349 to replace the marked-up copy of page 349 included in Attachment C of the October 21, 1997 submittal.

The revised page 349 adds a sentence to Technical Specification Section 6.2.2i that states, "Only licensed individuals may direct licensed activities." The clarification is being added to Section 6.2.2i to address NRC Staff concerns, communicated to NMPC, with respect to unclear wording contained within NMPC's October 21, 1997 submittal.

The additional wording is consistent with the changes previously proposed and evaluated for Sections 6.2.2i and 6.3.1, and it does not change the no significant hazards determination conclusion of the October 21, 1997 submittal.

Sincerely,

Carl D. Terry
Vice President

Nuclear Safety Assessment and Support
