RE: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Subject: LER 98-16 "Core Spray Pump Motor Bearing Cooling Flow Outside Design Basis Requirement"

Gentlemen:

Corrective Action 7 of License Event Report (LER) 98-16, "Core Spray Pump Motor Bearing Cooling Flow Outside Design Basis Requirement," stated that training would be provided to certain station personnel in order to further ingrain the necessity of rigorous evaluations into daily work habits, by November 15, 1998. This letter is to change that commitment to December 31, 1998.

The reason for this delay is to combine the lessons from this event with other in-house operational experience, expand the scope and depth of this training, and enlarge the audience. This training will now be provided to all Operations, Maintenance, Engineering, and Technical Support Branch Managers and their department supervision. Therefore, additional time will be needed to complete the training.

Very truly yours,

Robert G. Smith
Plant Manager - NMP1
