RULES OF PROCEDURE

General Comment

ID NRC-2016-0231

This is extremely dangerous in terms of transport (i.e., the potential for accident) and potential for problems upon arrival. In West Texas we have a number of environmental concerns--our water is not drinkable due to fracking, our air smells of gas, we have long term droughts. Putting more waste in our backyard is frightening and untenable. Why should we bear this risk? The benefits are too small in comparison! This should concern all families in this community. Please do not house nuclear waste in West Texas!
