General Comment

I am opposed to the relocation of high level nuclear waste in Andrews County TX. I have been informed that this material is to be stored above ground with minimal security. The nearest fire station is in Eunice, NM-a volunteer fire department. Concentrating large amounts of this material in one location presents an inordinate risk to residents of the entire area, and leaves those of us who live in the area vulnerable to a terrorist threat that is potentially very disastrous. I think that congress needs to finance a waste site that will store this material deep underground, thereby shielding the public from the disastrous consequences of a terrorist attack or accident.
