General Comment

Hi. I've been asked to oppose private permanent parking lot dumps for high-level radioactive waste targeted at low income, Latin American communities already disproportionately impacted by dirty and dangerous energy industries, including fossil fuels and nuclear!

I'm for nuclear as an energy source, and honestly find that to be a better bridge to even cleaner energies than natural gas was allegedly supposed to be. However, please be sure that you take all measures possible to keep the radioactive waste from negatively impacting relatively poorer communities.

Thank you.
