SUBJECT: NON-PUBLIC SECURITY INSPECTION PLAN FOR COMANCHE PEAK
NUCLEAR POWER PLANT, UNITS 1 AND 2 (NUCLEAR REGULATORY
COMMISSION PHYSICAL SECURITY INSPECTION REPORT
NUMBERS 05000445/2016402 AND 05000446/2016402)

Dear Mr. Peters:

On February 14, 2017, the NRC completed its end-of-cycle performance review of Comanche Peak Nuclear Power Plant, Units 1 and 2. The results of that review have been transmitted to you separately in a publicly available assessment letter. This letter informs you of the NRC's plans for future security-related inspections at your facility.

The enclosed inspection plan lists the security-related inspections scheduled through December 31, 2018. The inspections listed during the last nine months of the inspection plan are tentative and may be revised at the next semiannual performance review. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes.

While we are fully committed to our goal of ensuring openness in our regulatory process, we must balance that goal with the more immediate need of ensuring the continued safety and secure operation of nuclear facilities and the protection of nuclear materials in our country.

Thus due to the security-related information contained in this correspondence, and in accordance with NRC Policy For Handling, Marking, and Protecting Sensitive Unclassified Non-Safeguards Information, a copy of this letter and its enclosure will not be available for public inspection in either the NRC Public Document Room or the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

“Enclosure transmitted herewith contains SUNSI. When separated from enclosure, this transmittal document is decontrolled.”
