Expedite_UrgencyToInformText:

Waiver_Purpose: For historical review and analysis of the work conducted at the facility as part of private sector nuclear research and cold war era efforts in a historical context.

Waiver_ExtentToExtractAnalyze: We are reviewing the activities and research conducted at the facility and how it impacted both US defense and energy knowledge and the influence on the regional community in a historical context.

Waiver_SpecificActivityQuals: A historical review of the activities and research at the Pawling NY facility towards a historical overview of the facility and its efforts and how that influenced technical understanding at the time. How private sector facilities influenced technical understanding and the communities they were sited in.

Waiver_ImpactPublicUnderstanding: There is little public understanding of this facility or its impact. These records would help us clarify the full history of the facility and assure accurate public understanding.

Waiver_NatureOfPublic: This would give a fuller understanding of cold war era activities and technical understanding for a world wide audience. A better understanding in a US history context and towards the regional contributions of the area during the cold war.

Waiver_MeansOfDissemination: We publish a variety of reports, papers and books free to the general public to help understand technical issues related to nuclear technology, historical nuclear events and nuclear history in general.

Waiver_FreeToPublicOrFee: We publish all of our works in at least one free format so the public can access our finished work without charge.

Waiver_PrivateCommericalInterest: We have no commercial or private interests in this facility or historical events related to the FOIA request.
