SUBJECT: REQUEST TO LIBRARY TO MAINTAIN THE WCS LICENSE APPLICATION
FOR A CONSOLIDATED INTERIM STORAGE FACILITY (DOCKET NUMBER
72-1050)

Dear Ms. Stottlemire:

The U.S. Nuclear Regulatory Commission (NRC) received a license application from Waste Control Specialist LLC (WCS) to construct and operate a consolidated interim storage facility for spent nuclear fuel at the WCS site in Andrews County, Texas. We are reaching out to the Andrews County Library to request its assistance in establishing an information repository and maintaining reference documents at the library. The documents are associated with the NRC's environmental review of the WCS' license application.

As part of the review of the WCS' request, the NRC will make available to the public various documents regarding the project and the NRC's review process. This letter transmits the documents shown in the attached list. Electronic versions of these documents are available in the NRC's Agencywide Documents Access and Management System (ADAMS), accessible via the internet at <http://www.nrc.gov/reading-rm/adams.html> using the ADAMS Accession Numbers in the attached list. We are kindly requesting that copies of all documents on file be kept at the library for a period of 3 years, if possible, for the public's use. Additional documents will be sent to you as they become available.

We appreciate your willingness to assist the public in participating in the NRC's environmental review process. If you have any questions, please contact Mr. James Park at 301-415-6954, or by e-mail at James.Park@nrc.gov.

Sincerely,

/RA/
