SUBJECT: SUMMARY OF PUBLIC MEETING BETWEEN BRUKER
DETECTION CORPORATION AND THE U.S. NUCLEAR
REGULATORY COMMISSION

On February 27, 2017, staff from the U.S. Nuclear Regulatory Commission (NRC) and representatives of Bruker Detection Corporation (Bruker), a Massachusetts based company, held a meeting to discuss NRC requirements set forth in Title 10 of the *Code of Federal Regulations* (10 CFR) Part 30 regarding expiration and termination of licenses. A list of attendees is enclosed.

The specific objective of the meeting was to discuss Bruker's questions regarding the requirement for license renewal and license application review process. The NRC was able to address Bruker's questions and identify what information the applicant would need to submit for an expedited review of their license application.

Following the discussion, the Bruker representatives confirmed their understanding of what the NRC would expect as part of their application submission. In addition, Bruker submitted the license application at the conclusion of the meeting. A member of the public attended the meeting via the conference line, but did not provide any questions or comments.
