South Carlestone, WV 25303-1411

SUBJECT: CLEARON CORP., CONSENT TO TRANSFER LICENSE, MAIL CONTROL NO.  
592510

Dear Mr. McKittrick:

During an inspection on November 2, 2016, the inspector was informed of what appeared to be an indirect transfer of control by the licensee. The inspector requested additional information that was submitted by the licensee in a letter dated December 2, 2016, Agencywide Documents Access and Management System (ADAMS) Accession Number ML16350A388. In the letter Clearon Corp. notified the U.S. Nuclear Regulatory Commission (NRC) of an indirect transfer of control of the above license to Hui Yu Xin American Corporation (Dalian Group).

This transfer occurred without the NRC's prior review and approval, as required by § 184 of the Atomic Energy Act of 1954, as amended (Title 42, *United States Code* (42 USC) 2234 and Title 10, *Code of Federal Regulations* (10 CFR) § 30.34. A Notice of Violation was issued to you on January 26, 2017, ADAMS Accession Number ML17031A128.

Based on the above understandings, as more fully detailed in the enclosed NRC staff's Safety Evaluation Report, which documents the NRC staff's safety review of the transfer, the NRC finds the transfer to be consistent with NRC requirements.

Based on the above, the NRC consents to the indirect transfer of control of NRC Materials License No. 47-24837-01. Future changes in the licensee's named, licensed use, licensed materials, licensed location, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change, as it was with the action at issue here. If you have any questions regarding this letter, please contact Dennis Lawyer at 610-337-5366 or via electronic mail at [dennis.lawyer@nrc.gov](mailto:dennis.lawyer@nrc.gov).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.
