Dear Dr. Jackson:

I have been opposed to nuclear power ever since the U.S. exploded those bombs on Japan. I now wish to confirm my agreement with the New England Coalition's position that the N.R.C. keep the stricter temperature limits in place until Vermont Yankee can prove (as it has not yet done) that their new analysis has produced a temperature limit that is "absolutely safe."

The public must have this before the reactor is started again!

Yours sincerely,

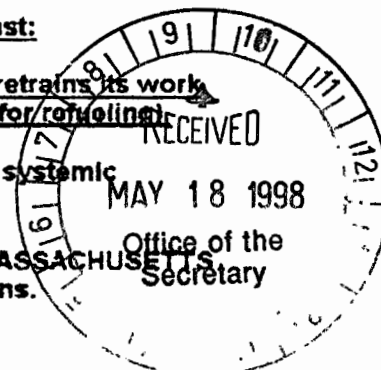

Eleanor Worthen
