Subject: Final Summary of 2/23 call w/NFS re: GL 2015-01
Date: Thursday, March 02, 2017 4:14:00 PM

On February 23, 2017, the following individuals participated in a call regarding the status of response actions for questions concerning Generic Letter 2015-01, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities":

Kevin Ramsey, NRC
Jonathan Marcano, NRC
Tim Sippel, NRC

Amaryl Morie, NFS
Bob Mauer, NFS
Blaine Rice, NFS
Nick Brown, NFS
Frank Hand, Contractor

NFS reported that walkdowns of IROFS and other internal components have been completed. The contractor will now return to his home office to review design documentation and begin preparing design reports. The contractor reported that some components don't fit the general rule. For example, some piping is PVC, not steel. These components will need some additional work, but the contractor doesn't see any show-stoppers. Some components have been retrofitted and the contractor is reviewing the retrofits. The contractor expects to provide the design reports to NFS by the end of March.

Kevin M. Ramsey
