Desc: All records not already publicly available in ADAMS or on the NRC's public website related to EPRI Technical Report 3002005385, "Severe Nuclear Accident: Lessons Learned for Instrumentation, Control and Human Factors," dated December 2015. Records of an administrative or logistical nature may be excluded from this request, such as emails scheduling a time and place for staffers to discuss the report and emails informing staffers about the availability of the report. This request seeks records about the NRC's review of this report and about the NRC's decisions and efforts to factor information from this report into the NRC's post-Fukushima efforts. I ask that the records released in response to this request be provided in digital form. If all records released in response to this request are made publicly available in ADAMS, there's no need to copy them onto a CD and mail it to me -- I can view/download the records in ADAMS.
