SUBJECT: SURRY POWER STATION, UNIT NOS. 1 AND 2 - CORRECTION LETTER TO
LICENSE AMENDMENT NOS. 287 AND 287 RE: GENERIC LETTER 2008-01
(GAS ACCUMULATION) (CAC NOS. MF5600 AND MF5601)

Dear Mr. Stoddard:

By letter dated February 29, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16042A173), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment Nos. 287 and 287 to Renewed Facility Operating License Nos. DPR-32 and DPR-37 for the Surry Power Station, Unit Nos. 1 and 2 (Surry, Units 1 and 2), respectively. The amendments changed the Technical Specifications in response to Virginia Electric and Power Company's application dated January 14, 2015, as supplemented by letters dated February 19, August 19, and December 3, 2015, and January 25, 2016.

The amendments adopted NRC-approved Technical Specifications Task Force (TSTF) Standard Technical Specifications Change Traveler TSTF-523, Revision 2, "Generic Letter 2008-01, Managing Gas Accumulation" (ADAMS Accession No. ML13053A075), dated February 21, 2013. The amendments also proposed an addition of a surveillance requirement only for systems that are susceptible to gas accumulation.

Subsequent to the issuance of the amendments, the NRC staff discovered typographical errors on page 3 of the license pages for Surry, Units 1 and 2. Specifically, the last sentence in paragraph 3 of the license pages for both units are corrected to replace the word "nor" with "now." In addition, paragraph 3.I of the Surry, Unit 1 license is corrected to indicate the date of the SER supplement of "December 18, 1980." These errors are administrative in nature and correcting them does not affect the safety evaluation for Amendment Nos. 287 and 287.

Enclosed are the revised license pages for both units. Please replace the corresponding pages issued by Amendment Nos. 287 and 287 for Surry, Units 1 and 2, respectively.

D. Stoddard
