Dr. George E. Miller, Reactor Supervisor
Nuclear Reactor Facility
Department of Chemistry
University of California
1102 Natural Sciences 2
Irvine, CA 92697-2025

SUBJECT: UNIVERSITY OF CALIFORNIA, IRVINE - NON-POWER REACTOR
CLOSEOUT OF GENERIC LETTER 2016-01, "MONITORING OF
NEUTRON-ABSORBING MATERIALS IN SPENT FUEL POOLS" FOR THE
UNIVERSITY OF CALIFORNIA-IRVINE NUCLEAR REACTOR FACILITY,
DOCKET NO. 50-326 (CAC NO. A11010)

On April 7, 2016, the U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 2016-01, "Monitoring of Neutron-Absorbing Materials in Spent Fuel Pools" (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16097A169), to address the degradation of neutron-absorbing materials (NAM) in wet storage systems for reactor fuel at power and non-power reactors.

For the non-power reactors, GL 2016-01 requested that licensees provide facility-specific information related to the use of NAM. This information was needed by the NRC staff to verify continued compliance through licensee implementation of effective methods for monitoring of reactor fuel in wet storage so as to detect and mitigate any degradation or deformation of NAM when credited in the facility licensing or design basis for criticality control of fuel in wet storage.

On May 27, 2016, the University of California-Irvine submitted a response to GL 2016-01 (ADAMS Accession No. ML16162A167) for University of California-Irvine Nuclear Reactor Facility. The NRC staff conducted a review of your response to GL 2016-01 and determined that your facility does not use NAM in wet fuel storage. Based upon the information you submitted in response to GL 2016-01 and the results of the NRC staff review, the NRC staff has determined that the submission addresses the information requested in GL 2016-01. No further information or action is requested regarding this matter.

Sincerely,

/RA/

Alexander Adams Jr., Chief
Research and Test Reactors Licensing Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation
