Mr. Crosslin,

The NRC is finalizing a license amendment for Watts Bar Nuclear Plant (WBN), Units 1 and 2. Per 10 CFR 50.91(b), 10 CFR 50.91(b)(3) and (b)(4), we are notifying you of the proposed issuance. The amendment corrects several licensee-identified editorial inconsistencies incorporated in the initial issuance of the Unit 1 and

2 Technical Specifications (TS). Additionally, the license amendment adds a new TS condition to the WBN, Unit 2 TSs clarifying operator response during events associated with tornado warnings.

The licensee's submittal dated June 7, 2016, is available in ADAMS under Accession No. [ML16159A208](#).

The amendment was noticed in the *Federal Register* on August 2, 2016 (81 FR 50740) (see attached). The NRC has not received public comments or been requested to conduct hearings on the proposed licensing actions.

You may direct any questions or comments regarding this license amendment to me by Wednesday March 22, 2017. You can contact me by e-mail at Russell.Haskell@nrc.gov, or by phone at 301-415-1129.

Sincerely,

Russell S. Haskell II
