

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
REGION IV
1600 E. LAMAR BLVD
ARLINGTON, TX 76011-4511

March 14, 2017

MEMORANDUM TO: Christopher G. Miller, Director
Division of Inspection and Regional Support
Office of Nuclear Reactor Regulation

FROM: Troy W. Pruet, Director */RA/*
Division of Reactor Projects
Region IV

SUBJECT: CALENDAR YEAR 2016 BASELINE INSPECTION COMPLETION

This memorandum documents the results of Region IV's implementation of the Reactor Oversight Process (ROP) Baseline Inspection Program for calendar year (CY) 2016 in accordance with Inspection Manual Chapter (IMC) 2515. Region IV completed the baseline inspection program at all regional reactor licensees subject to the ROP.

Reactor Program System Report 8a is enclosed and provides the completion status of the baseline inspection procedures for all Region IV sites. Note that along with the status, some procedures have attached notes as described in IMC 0306. In some cases, procedures are performed on a biennial or triennial frequency and were not required to be performed in CY2016. Also, in some cases, procedures were considered complete with less than the minimum samples because sufficient samples were not available. In other cases, all requirements of the procedure were met by work done in another procedure. Procedures were marked as not applicable if they were not required to be performed this inspection cycle. Inspection activities listed under Inspection Procedure (IP) 71130 and 71150 are parent procedures that do not have specific requirements. Additional information is annotated in the Reactor Program System Inspection Report (RPS/IR).

Reactor Program System Report 8a does not include security and safeguards inspection program status. However, the baseline program for security and safeguards for all Region IV sites was also verified complete for CY2016.

CONTACT: Thomas R. Hipschman, IPAT/DRS
817-200-1491

The Fort Calhoun Station permanently shut down on October 24, 2016, and was transitioned from IMC 0305, "Operating Reactor Assessment Program," IMC 0608, "Performance Indicator Program," and IMC 2515, "Light-Water Reactor Inspection Program," to the IMC 2561, "Decommissioning Power Reactor Inspection Program," effective December 28, 2016, NRC's Agencywide Documents Access and Management System Accession Number (ML16363A449).
