Reviewer: JDC Date: 3/13/17

1. Please note that your response to Items 8 and 10.2 reference NUREG-1556, Vol. 1, Rev. 1; however, your response to Item 10.6, reference NUREG-1556, Vol. 1, Rev. 2.

Please note that NUREG-1556, Vol. 1, *Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Portable Gauge Licenses* was superseded by NUREG-1556, Vol. 1, Rev. 2 in June 2016.

Please complete and resubmit the attached Appendix B of NUREG-1556, Vol. 1, Rev. 2, *Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Portable Gauge Licenses* (<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v1/>) which is the suggested format for Items 5 through 11 of NRC Form 313, Application for Materials License.

2. Please provide an organization chart with individual's names and positions/titles.
3. Please indicate if your company has or ever had an NRC or Agreement State license for portable gauges.

If so, please state the NRC or Agreement State license number.

4. Please indicate if your company has a current State or federal government license/registration/authorization for other operations within the scope of its proposed licensed activities.

If so, please state the State or federal government license/registration/authorization number.

5. Please indicate if you have been a previous authorized user or Radiation Safety Officer (RSO) of a portable gauge working under an NRC or Agreement State portable gauge license.

If so, please state his years of work experience as a portable gauge user with another company, company name, and license number, if applicable.

6. Please provide copies of proof of business insurance, federal tax identification number, professional licenses, and/or driver's license of the proposed RSO.
7. Please confirm if the gauges will be used at temporary job sites.
8. Please update your response to Item 8, training for individuals working in or frequenting restricted areas, of your new license application to state NUREG-1556, Vol. 1, Rev. 2 in lieu of NUREG-1556, Vol. 1, Rev. 1.
9. Please update your response to Item 10.2, radiation safety program – radiation monitoring instruments, of your new license application to state NUREG-1556, Vol. 1, Rev. 2 in lieu of NUREG-1556, Vol. 1, Rev. 1.

10. For Item 10.4, radiation safety program – occupational dose, you provided both of the following responses; however, please note that this is an either or response.
- The statement: “We will maintain, for inspection by the NRC, documentation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in 10 CFR 20.1502(a).”

OR

- The statement: We will provide and require the use of individual monitoring devices (dosimetry). All personnel dosimeters that require processing to determine the radiation dose will be processed and evaluated by a NVLAP-approved processor.”

Please explain your discrepancy.
