**Re: Control Number 592452
License No. 21-18502-01, Holland Community Hospital.**

Dear Ms. Casey,

Attached is the training and work experience documentation required to add Catherine E. De Leeuw, M.D. and Jason P. Dykstra, M.D. as authorized users for radioactive seed localization.

If you have any additional questions please contact me at (734) 662-3197 or dedwards@mpcphysics.com or Erik Badgero at (616) 394-3190 or erikba@hollandhospital.org.

Thank you for your cooperation in this matter.

Sincerely,

Dawn M. Edwards, M.S.

Training and Work Experience for Radioactive Seed Localization

Catherine E. De Leeuw, M.D. and Jason P. Dykstra, M.D. have completed the following training and worker experience under my supervision:

- Work experience with 3 cases wherein needles were utilized to implant seeds.
- The work experience included identifying (radioactive seed appearance and characteristics), preparing, implanting, and observing the removal of RSL sources safely, including radiation safety and handling procedures and precautions.
- The work experience included routine monitoring before, during and after all uses of the seeds to ensure rapid identification and remediation of a damaged, ruptured, lost/missing or leaking source.

I attest that Catherine E. De Leeuw, M.D. and Jason P. Dykstra, M.D. have satisfactorily completed the required training for 10 CFR 35.1000 use (limited to iodine-125 for temporary implants to localize non-palpable lesions) and have achieved a level of competency sufficient to function independently as an authorized user for this use.

Susan Ervine, M.D.,

Dear Dawn,

We cannot accept the "signature" on your letter dated March 8, 2017. Only an actual physically applied signature is acceptable. Please resign the letter and resubmit it. It should also be addressed to my attention since this is a case already assigned and pending, and not an initial, unassigned action. Thanks very much.

(Please address me as "Colleen")
