## **GEH Revised Response to RAI 14.03-1**

### **IMPORTANT NOTICE REGARDING CONTENTS OF THIS DOCUMENT Please Read Carefully**

The information contained in this document is furnished solely for the purpose(s) stated in the transmittal letter. The only undertakings of GEH with respect to information in this document are contained in the contracts between GEH and its customers or participating utilities, and nothing contained in this document shall be construed as changing that contract. The use of this information by anyone for any purpose other than that for which it is intended is not authorized; and with respect to any unauthorized use, GEH makes no representation or warranty, and assumes no liability as to the completeness, accuracy, or usefulness of the information contained in this document.

**Update to RAI 14.03-1:**

This is the second update to the GEH response to NRC Request for Additional Information (RAI) 14.03-1. In the original response (Reference 1), GEH added the definition of “ASME Code” to Tier 1 of the ABWR Design Control Document (DCD). In the updated response (Reference 2), GEH revised the definition based on discussion with the NRC in a public teleconference held on February 23, 2017. In a subsequent NRC public teleconference held on March 16, 2017, certain clarifications to the DCD markups were discussed. The attached DCD markups address these clarifications by modifying the changes that were submitted in the previous update.

**Impact on the DCD:**

The DCD markups included with this updated response show the changes to Tier 1, Section 1.1, and Tier 1, Section 2.1.1. Note that the markups are on DCD draft Revision 7 pages that include the markups provided in Reference 2.
