

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

April 19, 2017

MEMORANDUM TO: Michael T. Markley, Chief  
Plant Licensing Branch II-1  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation

FROM: G. Edward Miller, Project Manager  
Special Projects and Process Branch  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation

A handwritten signature in black ink, appearing to read "G. Edward Miller".

SUBJECT: SUMMARY OF MARCH 13, 2017, PUBLIC MEETING WITH  
SOUTHERN NUCLEAR OPERATING COMPANY, INC., REGARDING  
LICENSE AMENDMENT REQUEST TO IMPLEMENT RISK-INFORMED  
TECHNICAL SPECIFICATION COMPLETION TIMES AT VOGTLE  
ELECTRIC GENERATING PLANT, UNITS 1 AND 2 (CAC NOS. ME9555  
AND ME9556)

On March 13, 2017, the U.S. Nuclear Regulatory Commission (NRC) staff held a public teleconference<sup>1</sup> with staff from Southern Nuclear Operating Company Company, Inc. (SNC or the licensee). The purpose of the call was to discuss SNC's license amendment request to implement risk-informed Technical Specification Completion Times for the Vogtle Electric Generating Plant, Units 1 and 2. Specifically, the discussion was focused on draft request for additional information (RAI) question 6 that was provided to SNC on January 24, 2017.<sup>2</sup> Following a January 26, 2017,<sup>3</sup> public meeting, the NRC staff modified the question to enhance clarity and reissued the draft question to SNC on February 3, 2017.<sup>4</sup> Following a February 7, 2017, public meeting,<sup>5</sup> the NRC staff again provided revised RAIs, including RAI 6 which deals with accounting for common-cause failure in emergent equipment failures to SNC.<sup>6</sup> This meeting focused on the response for RAI 6.

The licensee opened the meeting with a presentation addressing how risk management actions can impact risk and compared this impact to numerically adjusting the risk-informed Technical Specification Completion Times.<sup>7</sup> The NRC staff made a presentation that indicated the methods of addressing common-cause failure that were most likely to be successful.<sup>8</sup>

<sup>1</sup> The original meeting notice is available via the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML17060A467.

<sup>2</sup> The draft RAI is available under ADAMS Accession No. ML17027A018.

<sup>3</sup> The meeting summary for the January 26, 2017, meeting is available under ADAMS Accession No. ML17030A428.

<sup>4</sup> The revised draft RAI is available under ADAMS Accession No. ML17037A175.

<sup>5</sup> The meeting summary for the February 7, 2017, meeting is available under ADAMS Accession No. ML17041A366.

<sup>6</sup> The re-revised draft RAIs were provided on February 24, 2017, and are available under ADAMS Accession No. ML17058A127.

<sup>7</sup> The slides provided by SNC are available under ADAMS Accession No. ML17076A105.

<sup>8</sup> The NRC staff slides are available under ADAMS Accession No. ML17076A106.

At the end of the meeting, it was acknowledged that both parties understood the other's position and SNC indicated that it would provide a proposed response date shortly after the meeting. Subsequent to the meeting, SNC indicated that it would target April 4, 2017, for the final RAI response.

No regulatory decisions were made at the meeting. Following the discussion, an opportunity was afforded to any other participants who wished to ask questions or make comments. No questions or comments were received.
