## General Comment

I am writing to oppose NRC-2016-0231.

This should be halted for public health, environmental, transportation and groundwater concerns. Just to name a few.

It is 2017 and you would think we would have learned our lessons with nuclear ANYTHING. We are all very aware of the real life disasters that have been known to exceed the worst anticipated scenarios.

Furthermore, we must look at this from a long-term point of view. Nuclear waste has a LONG term lifespan and who/how/what is to be done? This is a very short-sighted idea and I oppose it on every level.

I live in Marfa, Texas and I do not want to be a "down-winder." Please consider the impact on our community, state and nation.

Thank you.
