General Comment

Re: docket number (NRC-2016-0231)

I am a resident of Marfa, Texas a distance only 200 miles from the proposed high-level nuclear waste storage facility near Andrews in the Permian Basin. I am opposed to the proposed expansion of the facility into an interim storage facility for high-level radioactive waste from the production of nuclear energy. While it may be viewed as a positive economic step for the town of Andrews, the potential long term negative environmental impact to the people and species of the region should not be overlooked.
