## General Comment

I am against (NRC-2016-0231), accepting high-level radioactive waste from nuclear power generation. While being called an "interim" facility, it is likely waste will be stored there for up to 40 years. This seems deceptive to the community. West Texas is the pristine, untouched land of this state, and I believe it should be preserved as such, without potential marring from waste sites. Best, Abbie P
