General Comment

I strongly oppose putting a high-level radioactive waste dump site in West Texas. I think it's a short-sighted move motivated by greed that could endanger millions of people and create long-term damage to the environment. As a resident of North Texas, I have a problem with people transporting the highly deadly material through our cities, especially with the threat of terrorism we live with. While other states are trying to get the dangerous material out of their communities, I don't believe Texas should invite everyone to bring theirs into our state. -Julie Thibodeaux, Fort Worth, Texas
