SAFEGUARDS (ACRS) PRESENTATION BY THE OFFICE OF
NUCLEAR REGULATORY RESEARCH (RES)

In support of the May 4, 2017 ACRS Full Committee Meeting on Consequential Steam Generator Tube Rupture (C-SGTR), staff has placed two draft documents in ADAMS for ACRS review. These documents are located in ADAMS package ML17082A324 and are declared as publicly available. These two documents are:

1. Current draft version of the C-SGTR NUREG-2195, titled: "Consequential SGTR Analysis for Westinghouse and Combustion Engineering Plants with Thermally Treated Alloy 600 and 690 Steam Generator Tubes";
2. Responses to the 2016 comments by ACRS members.

The presentation by RES to ACRS will focus on the contents of these documents.
