**Subject:** [External\_Sender] No Interim Storage Nuclear Wast Facility in Andrews Co., TX

Dear NRC,

I oppose the use of a nuclear waste facility in Andrews Co., TX. I support closing our nuclear power plants as a means to stop producing nuclear waste. There is a problem now with the radioactive by-products of nuclear energy. It is too dangerous. Look at the problem we have now in needing more storage space for the spent rods. And how many generations will have to care for these spent rods?

What we have learned from Chernobyl and Fukushima is that it's not too late to close a nuclear facility until it is too late, and the on-going damage perpetuates death and destruction for generations. There is no such thing as a safe nuclear power plant if you look to the future of our children and grandchildren to the seventh generation.

Instead, let us transition to a more local, post-industrial society that is safer, regenerative and sustainable. As a traveler through this area of the country, I love the vast areas of desert and out-croppings of rock in New Mexico and western Texas. There are long stretches of Earth where it appears that nothing lives except the creatures who have adapted to this way of living. Let it be. End nuclear energy power plants. The production of nuclear energy is unsafe anywhere.
