Re: Docket No. 50-275
Docket No. 50-323
Diablo Canyon Units 1 & 2

Dear Mr. Stolz:

Your letter dated February 13, 1980 described the following interim solution for rod drop protection:

- (a) The plant may operate in manual control from 0 to 100% power with no changes in the current rod insertion limits.
- (b) The plant may operate in automatic control from 0 to 90% power with no changes in the current rod insertion limits; above 90% power the D control rod bank would have to be withdrawn to 215 steps or greater.

Pacific Gas and Electric Company will implement this interim solution.

Very truly yours,

Philip A. Crane
