

DOCKET NUMBER  
PROD. & UTIL. FAC. 50-275,323

Shell Beach Ca  
June 5, 1980

Nuclear Reg. Comm.,  
Chairman Ahearn,  
Dear Sir,

I live six or eight miles from  
Diablo Nuclear Plant.

We recently had an Earthquake  
registering 4.6. It did not damage  
this time, but certainly proves  
Diablo should never be licensed  
to operate. We in this area would  
be subjected to fumes etc. The Plant  
is built on the Hosgus Fault. The  
route for disposal would have  
to pass thru the center of Shell  
Beach. We do not have adequate  
ways to evacuate in case of an  
emergency. Please help to deter  
this.

Respectfully  
Julia L. Sanderson
