Re: Docket No. 50-275
Docket No. 50-323
Diablo Canyon Units 1 and 2

Dear Mr. Miraglia:

The following additional information is submitted to you in regard to NUREG-0737.

1. Control Room Design Reviews (I.D.1)

As required by NUREG-0737, a preliminary review was performed by PGandE and approved by the NRC pending the completion of the changes discussed in Supplement 10 to the SER. In our February 26, 1981 letter to Mr. Frank J. Miraglia, Jr. we indicated the status of those changes. All changes will be completed prior to fuel load. When NUREG-0700 is issued, it will be addressed.

2. Plant Safety Parameter Display Console (I.D.2)

Generic letter 81-10 dated February 18, 1981 from Mr. D. G. Eisenhut requested PGandE to comply with requirements of NUREG-0737 item III.A.1.2, Upgraded Emergency Support Facilities. In our response to this letter, PGandE will address the Plant Safety Parameter Display System (SPDS) of NUREG-0737 item I.D.2. In particular, that response will provide confirmation of the implementation date for SPDS.

3. Design Review of Plant Shielding (II.B.2)

Enclosed as Attachment 1 is Supplement 1 to PGandE's report entitled, "Diablo Canyon Unit 1 Radiation Shielding Review, Revision 1;" which was submitted to you on February 20, 1981. Supplement 1 contains additional information for your review. PGandE will submit the following additional information to the NRC on May 15, 1981:

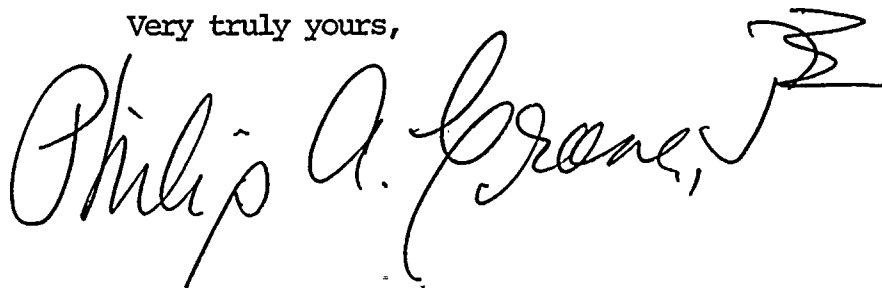

- o the results of the re-evaluation of the hydrogen recombiner control/power supply panel areas;
- o the results of the re-evaluation of the switchgear room area;
- o the vital area dose rate maps.

PGandE will revise the Diablo Canyon Unit 1 Radiation Shielding Review Report to incorporate the above information by July 3, 1981.

Advance copies of this submittal have been sent by courier to Mr. Bart Buckley.

Kindly acknowledge receipt of the above material on the enclosed copy of this letter and return it to me in the enclosed addressed envelope.

Very truly yours,

Enclosure
