Re: Docket No. 50-275
Docket No. 50-323
Diablo Canyon Units 1 and 2

Dear Mr. Miraglia:

In response to a Staff request, attached is information dealing with the status of fire fighting support by the California Department of Forestry (CDF).

In a letter dated April 20, 1981 from T. J. Waddell to R. C. Thornberry, CDF informed PGandE that it was rescinding the February 13, 1979 letter of understanding which provided for CDF to furnish backup fire protection services to the Diablo Canyon Nuclear Power Plant. From our reading of the April 20 letter it appears that CDF is primarily concerned with the development of an internal CDF response plan and radiation protection training for their personnel.

By letter dated April 29, 1981, PGandE stated that with the completion of the radiation training program, as outlined in its reply, all provisions of the February 13, 1979 letter of understanding will have been satisfied. Further, it is PGandE's opinion that CDF is still required by law to provide necessary and adequate fire support at Diablo Canyon notwithstanding the CDF letter of April 20, 1981.

Very truly yours,

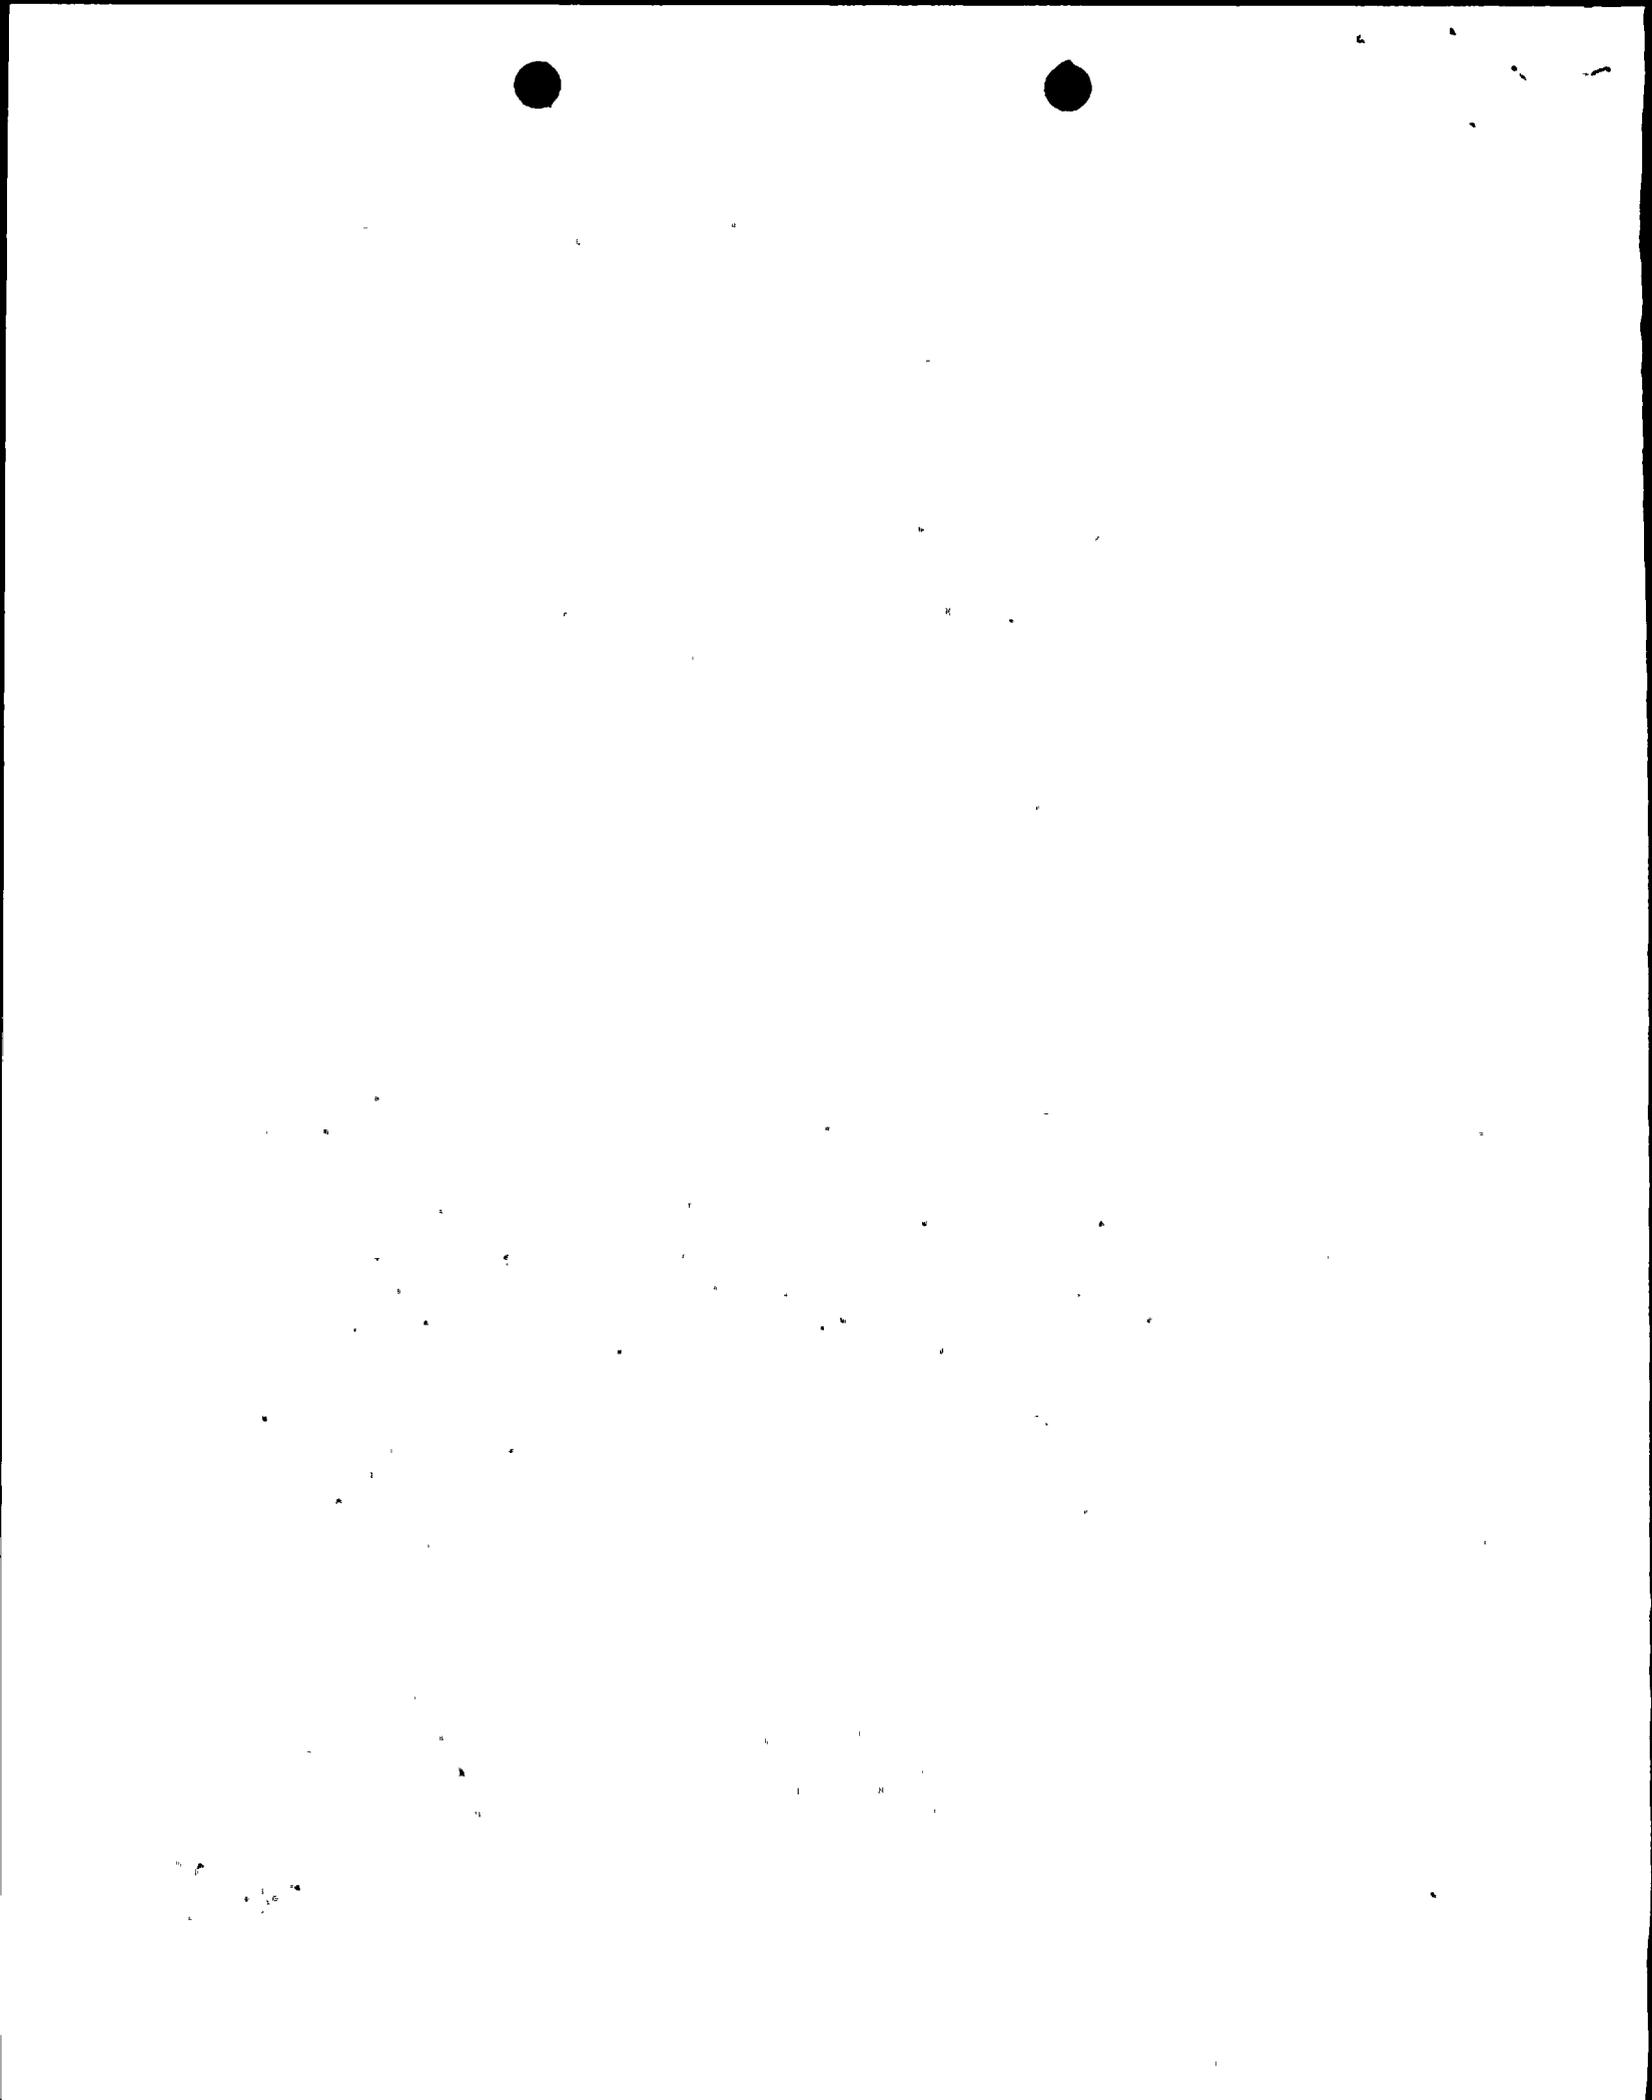

Philip A. Crane

R.C. THORBERRY
PLANT MANAGER

April 29, 1981

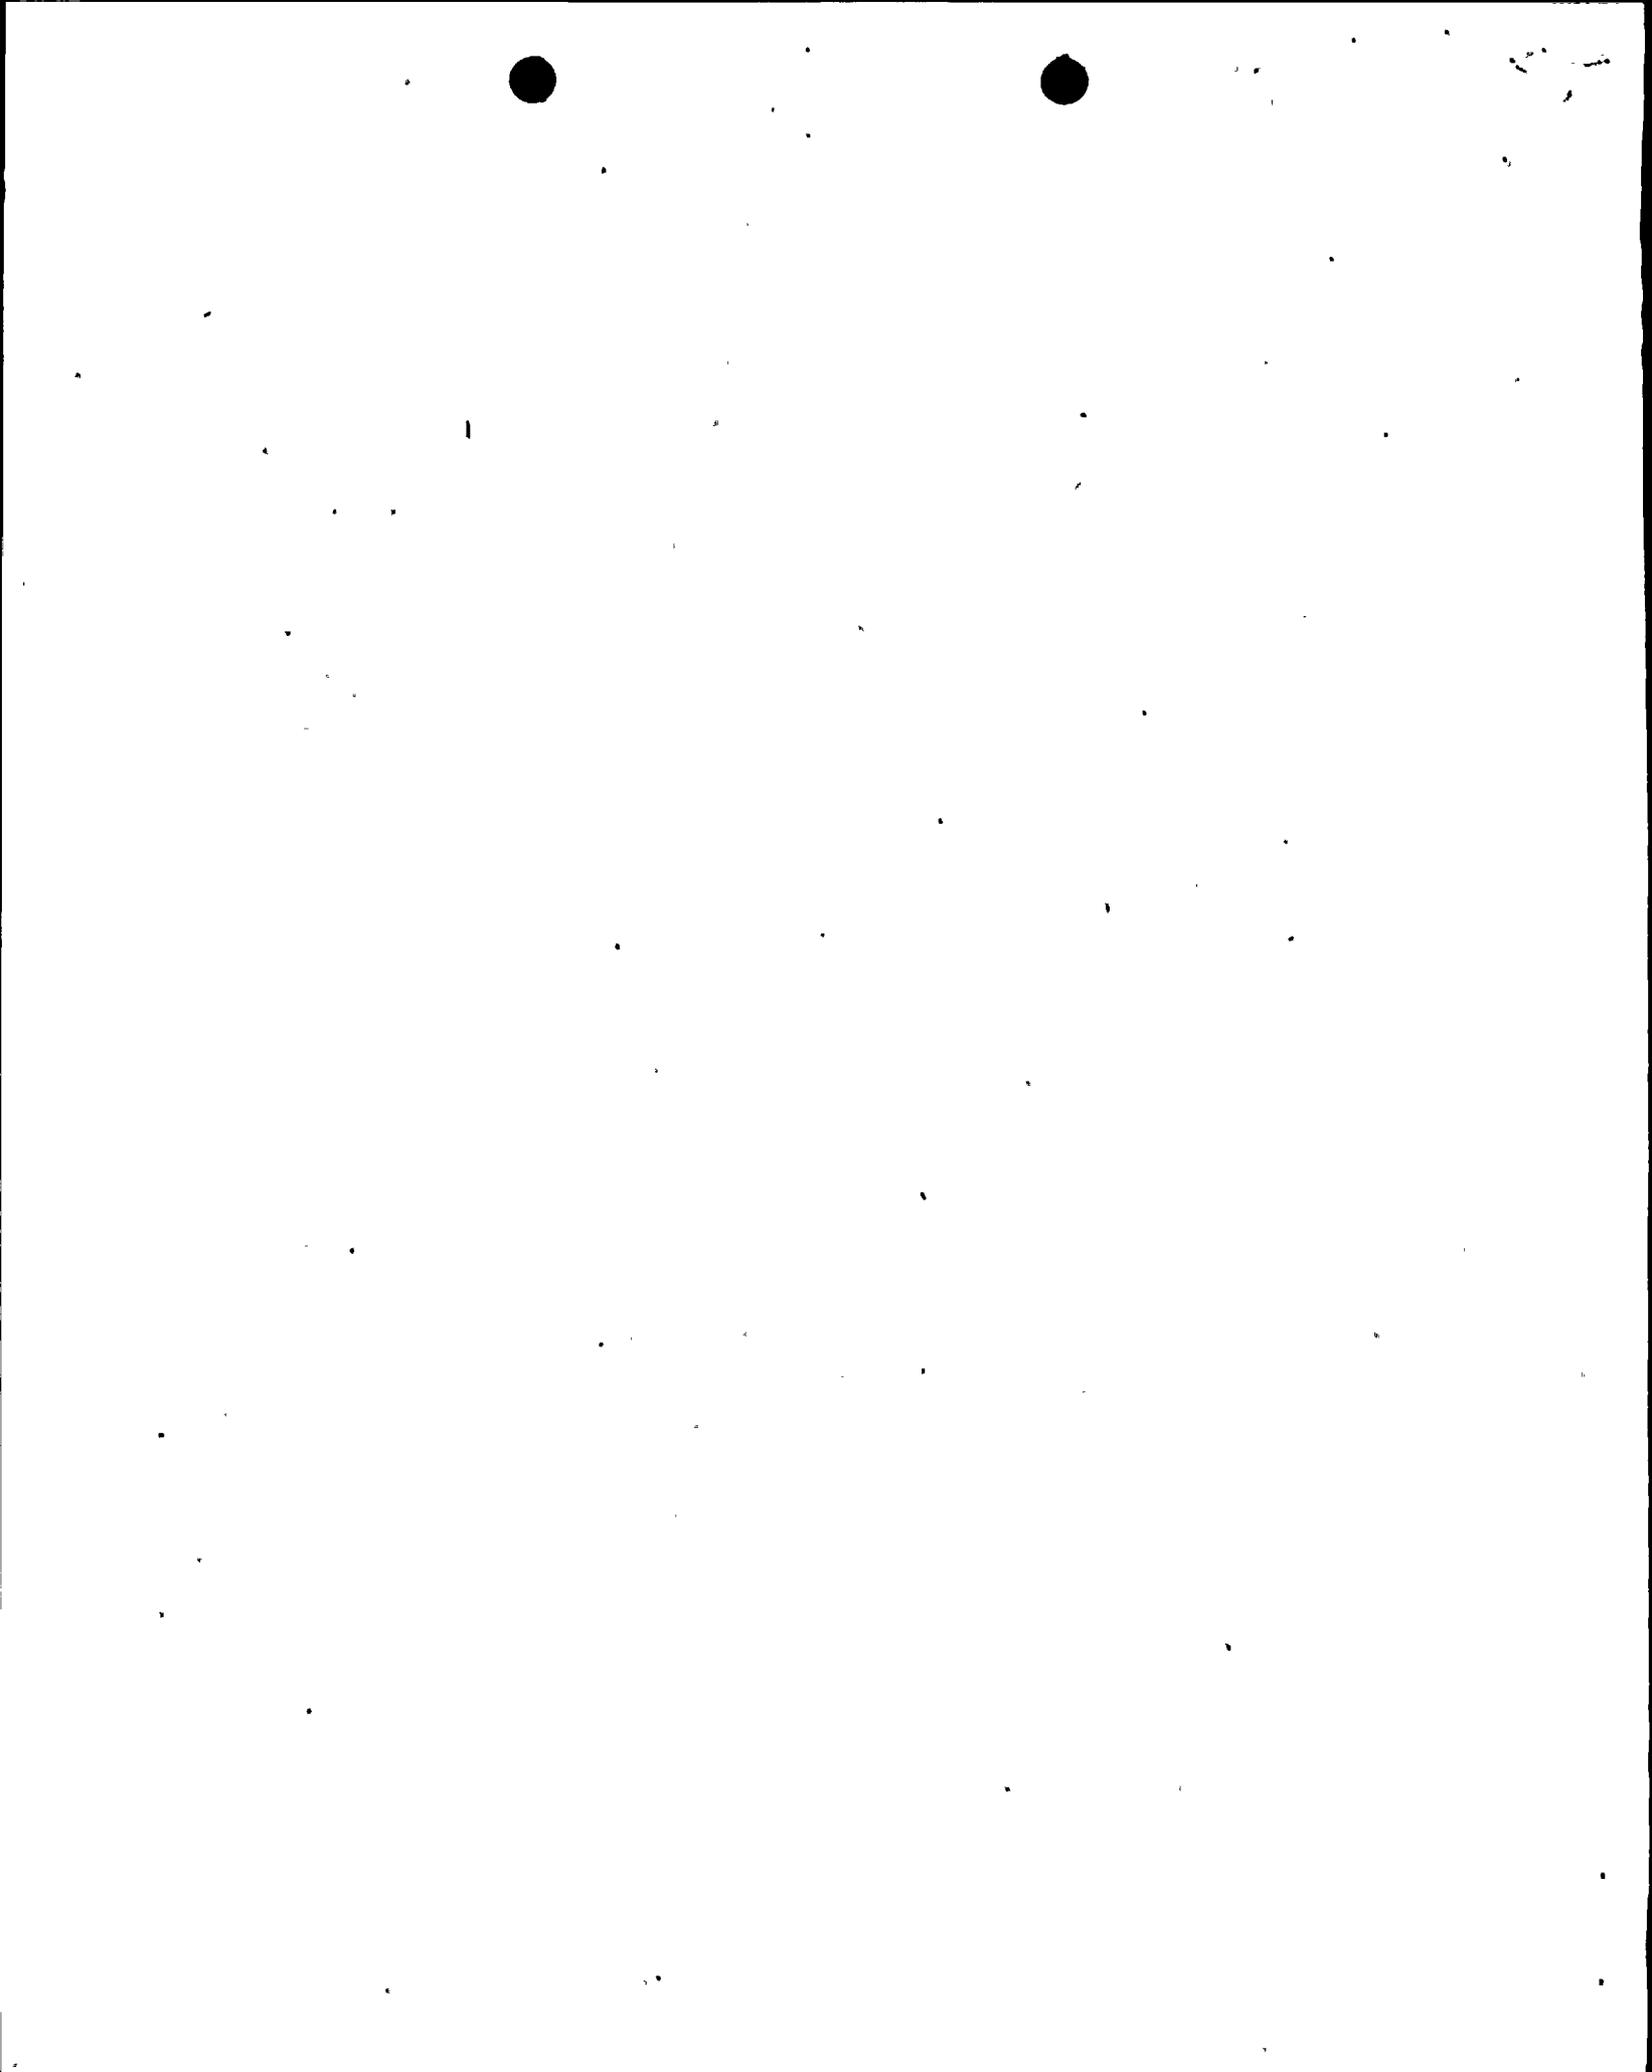

Mr. T. J. Waddell
Ranger-In-Charge
County Fire Chief
California Department of Forestry
P. O. Box 151, Highway 1, North
San Luis Obispo, CA 93406

Dear Mr. Waddell:

Pacific Gas and Electric Company is in receipt of your letter of April 20, 1981, rescinding the February 13, 1979 letter of understanding (copy attached) which provides for the California Department of Forestry to furnish backup fire protection services to the Diablo Canyon Nuclear Power Plant. It appears that CDF is concerned with the development of an internal CDF response plan and the radiation protection training for CDF personnel.

With regard to the general subject of training, we believe there are two aspects as far as CDF involvement with Diablo Canyon is concerned. The first aspect involves general plant familiarization. It is appropriate that this training be ongoing during the preoperational phase as well as the postoperational phase of plant life, since CDF assistance might be required before the plant is licensed. As you know, since the February 13, 1979 letter of understanding was issued, we have made the following training available not only to CDF personnel, but also, at times, to other volunteer firefighting groups:

1. November 26, 1980: Plant Familiarization Tour for California Department of Forestry Personnel - 20 CDF participants.
2. October 14, 1980: Quarterly Fire Drill at Diablo Canyon Nuclear Power Plant - 11 CDF participants.
3. February 14, 1980: Quarterly Fire Drill at Diablo Canyon Nuclear Power Plant - 7 CDF participants.
4. February 9, 1980: Plant Familiarization Tour for California Department of Forestry Firefighting Crews - 2 CDF participants and 10 Avila Valley Volunteers.

5. October 30, 1979: Plant Familiarization Tour for California Department of Forestry Crews - 7 CDF participants.
6. March 29, 1979: Fire Drill at Diablo Canyon Nuclear Power Plant - 8 CDF participants.
7. March 17, 1979: Plant Familiarization Tour of Diablo Canyon Nuclear Power Plant - 15 CDF participants.
8. March 13, 1979: Plant Familiarization Tour of Diablo Canyon Nuclear Power Plant - 10 CDF participants.

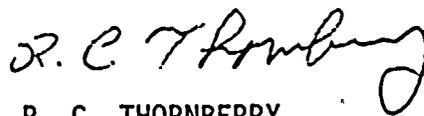

We feel that this provides an adequate level of training for CDF personnel to respond to any preoperational fire emergency.

There is, of course, no preoperational radiation hazard at Diablo Canyon. Because of this, and because of the inordinate delay in licensing, it has seemed most appropriate to us to defer this aspect of the training program until as close to startup as possible. With the anticipation of receiving a license in the near future, we have recently reinstated a series of radiation protection training programs onsite, and are making arrangements for personnel from interested offsite organizations to participate in this training. In this regard, Will Kaefer of my staff has been in contact with you, and a schedule has been established to train approximately 60 CDF personnel during the period between May 2 and May 23, 1981. Therefore, this training should be complete prior to our anticipated fuel loading date. However, regardless of the status of radiation protection training for CDF personnel, it has always been our intention to insure the safety of CDF personnel by providing trained PGandE radiation monitors during any fire emergency involving radiation.

In addition, Mr. Kaefer has provided you with considerable material describing our fire protection measures to assist you in preparing any written internal CDF plans which you deem necessary. We stand ready to assist you in any way we can in preparing or reviewing these plans.

Finally, it is our opinion that CDF is required by law to provide necessary and adequate fire support at Diablo Canyon and, notwithstanding the letter of April 20, 1981, CDF must continue to provide this support. With completion of the radiation training as noted above, we believe that all provisions of the February 13, 1979 letter of understanding will have been satisfied.

Sincerely,

R. C. THORBERRY

Attention: Mr. R.D. Ramsay, Plant Superintendent

Dear Mr. Ramsay:

This letter of understanding supercedes our letter of February 1, 1978. As discussed with your representative, this Department approves of and agrees to the following procedures.

1. To provide fire suppression support for grassland fires and/or in plant fires and emergency medical incidents at Diablo Canyon.
2. To participate in a fire drill on a semi-annual basis.
3. To make designated members of the Department available for basic training in radiation protection to be presented by P.G. & E. personnel.
4. That Department personnel, when called to assist in fire suppression, have the authority and responsibility to determine and utilize the most effective fire suppression methods, providing, that these methods do not adversely affect nuclear safety or the possible health and safety of the public.
5. That PG&E will, when asking for assistance, advise the Department if the potential for radiation exposure and/or contamination exists.
6. That, when the potential for radiation exposure and/or contamination exists, PG&E will provide dosimeters for Department personnel and will provide a trained monitor to accompany Department personnel to advise and insure that Forestry personnel are not unnecessarily exposed.
7. That PG&E will, at the conclusion of any fire suppression activity, monitor Department personnel and equipment for contamination and perform any decontamination work required.
8. That PG&E will replace any equipment that cannot be satisfactorily decontaminated.

Sincerely,

T.J. Waddell
 T.J. Waddell, Ranger-in-Charge/County Fire Chief

April 20, 1981

Mr. Robert Thornbery
Plant Superintendent
Pacific Gas & Electric Company
Diablo Canyon Power Plant
P.O. Box 56
Avila Beach, CA 93424

Dear Mr. Thornbery:

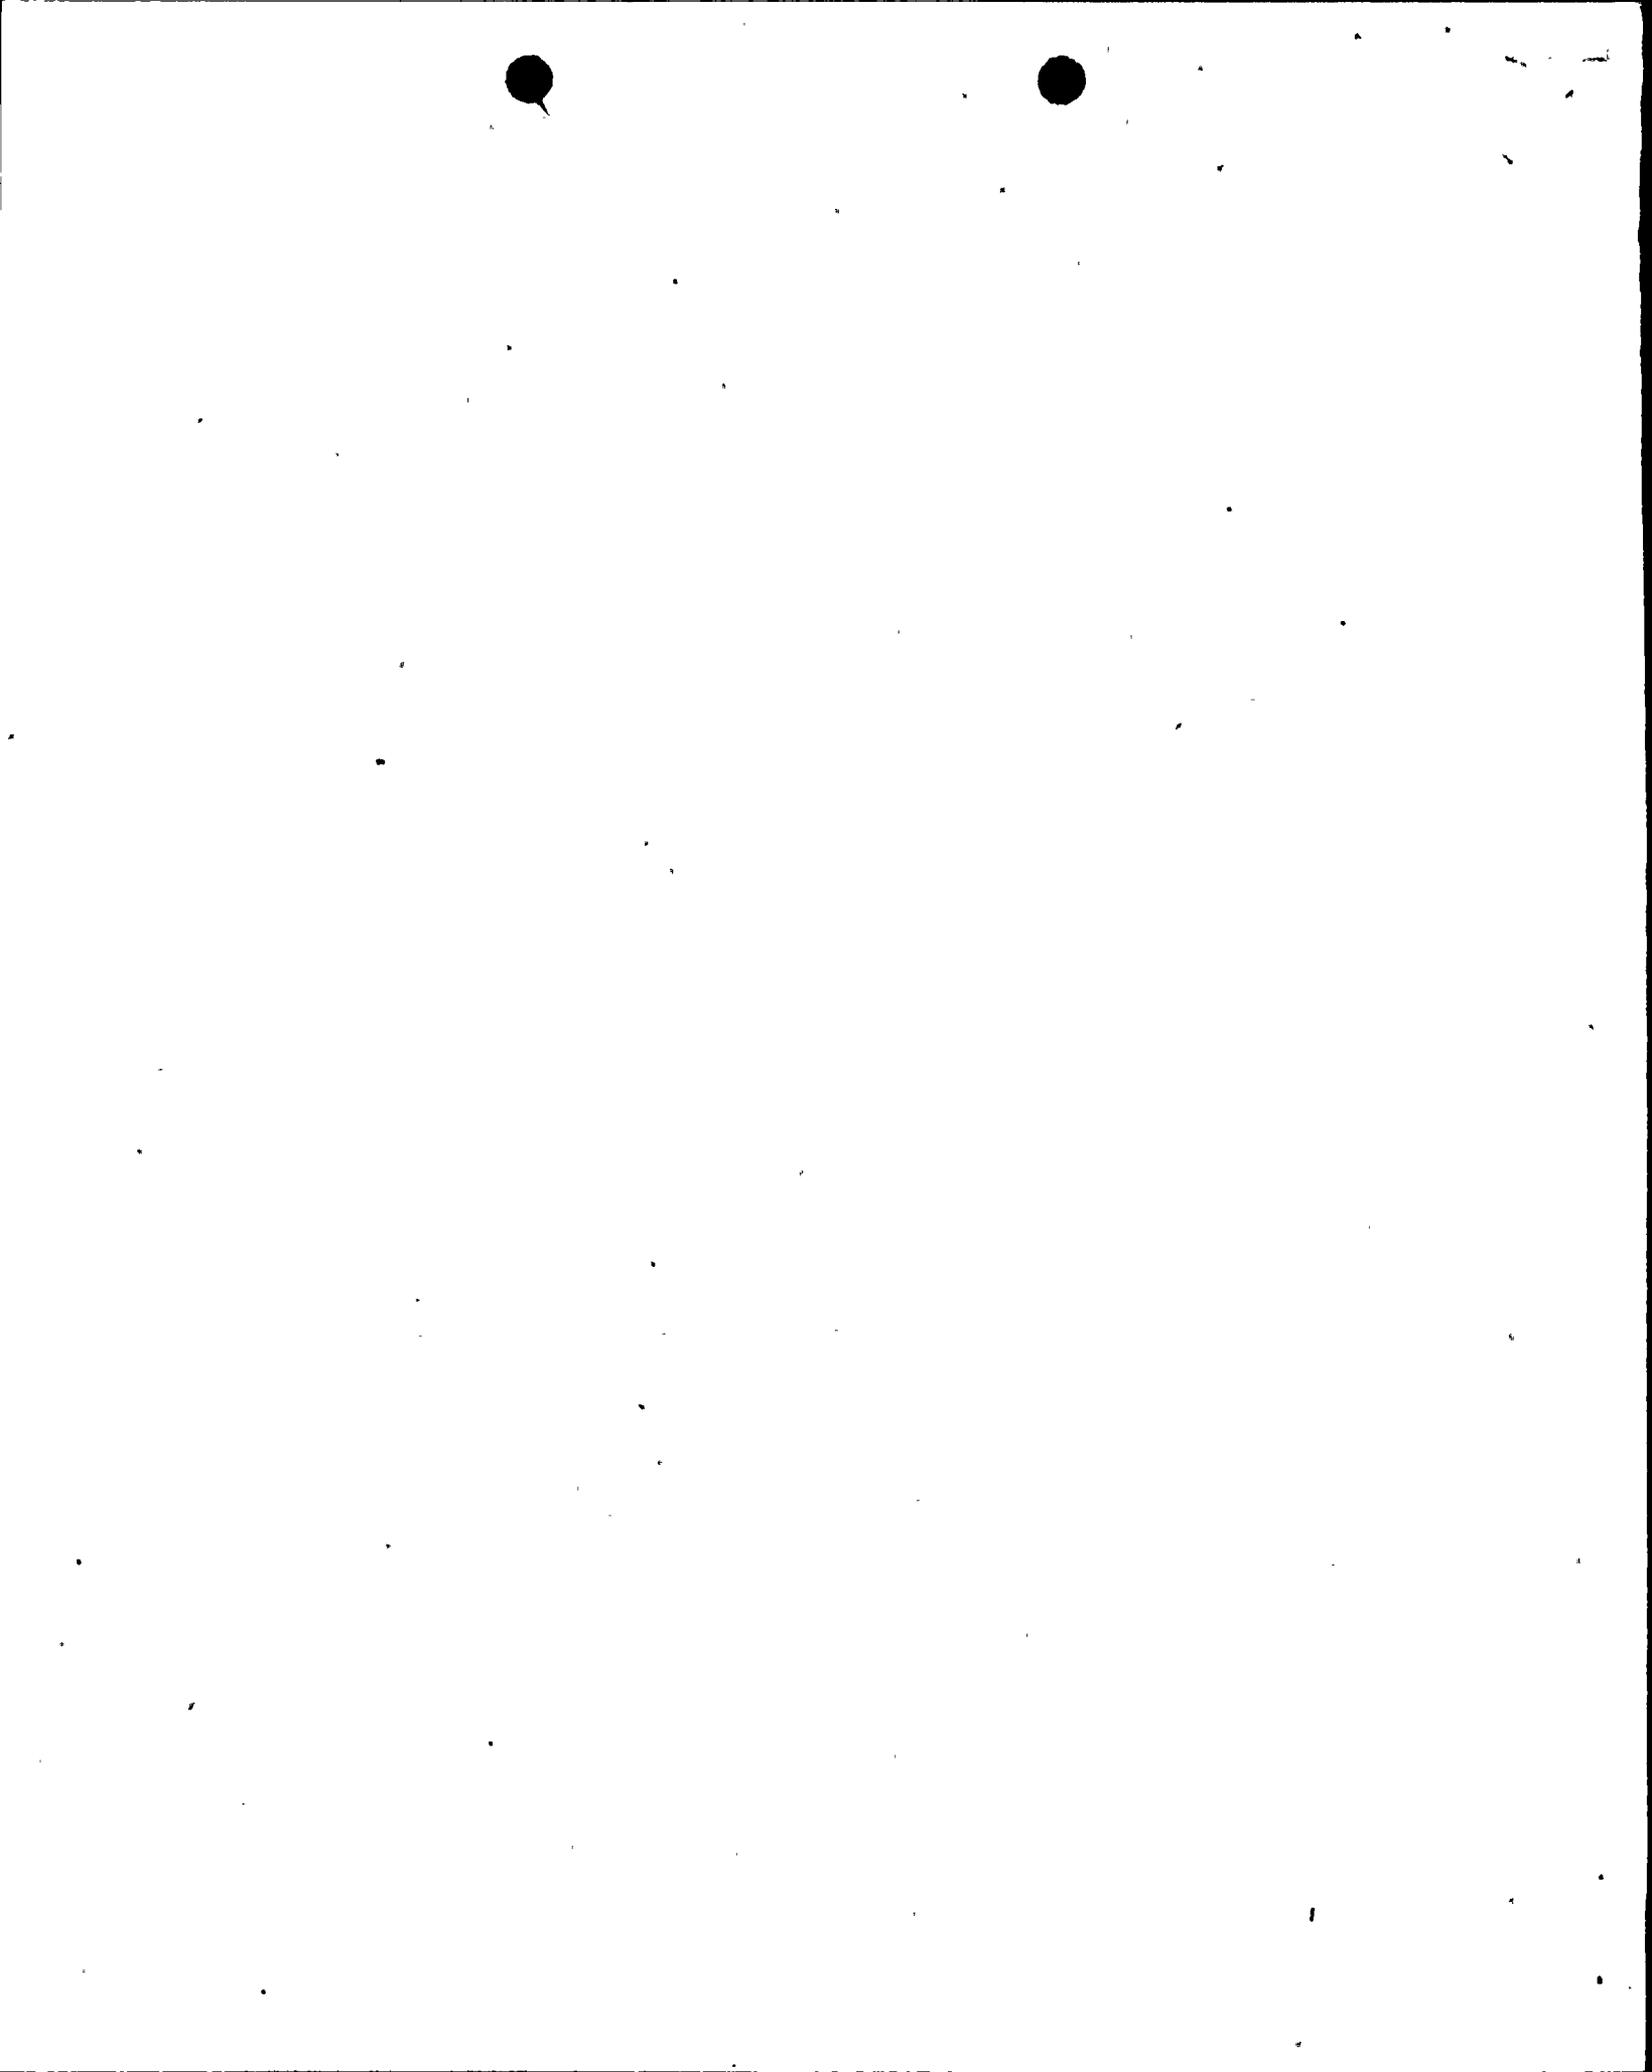

Thank you for the courtesies extended to me, to other California Department of Forestry representatives, and to representatives of other interested emergency service organizations on the tour of the Diablo Canyon Plant on 16-April.

My superiors have requested that I cancel the letter-of-understanding dated 13-February, 1979, which I had directed to your predecessor. The CDF and other interested fire service representatives are prepared to meet with P.G. & E. to develop an adequate and comprehensive plan for CDF's response to any on-site emergencies. You will recall that we have initiated participation from the other fire service representatives by my letter of 13-April, directed to all County Fire Chiefs, inviting them to a tour of the Diablo Canyon Plant on 14-May. This was coordinated by P.G. & E. representative, Chuck Richmond.

It seems to me that the plan should consist of at least three elements, they are:

1. Training needs - focused primarily on radiation protection and suppression efforts involving high voltage electrical fires.
2. An assessment of specialized equipment needs for off-site personnel responding to an incident at Diablo Canyon.
3. A fire pre-plan of the Diablo Canyon Plant, showing in routine schematic form, the inventory and location of firefighting equipment and primary access to the various structures. It should also address the structure of the P.G. & E. fire brigade and CDF liaison.

continued...

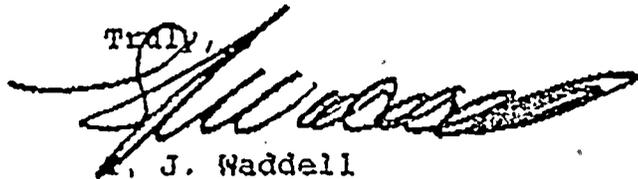

April 20, 1981

Upon completion of this planning effort we will then prepare a new letter-of-understanding, which will be reviewed by my superiors.

Finally, I must inform you that CDF will not respond to any Diablo Canyon facility on-site emergency where we might be faced with possible radiation hazards until appropriate training of CDF personnel has been completed.

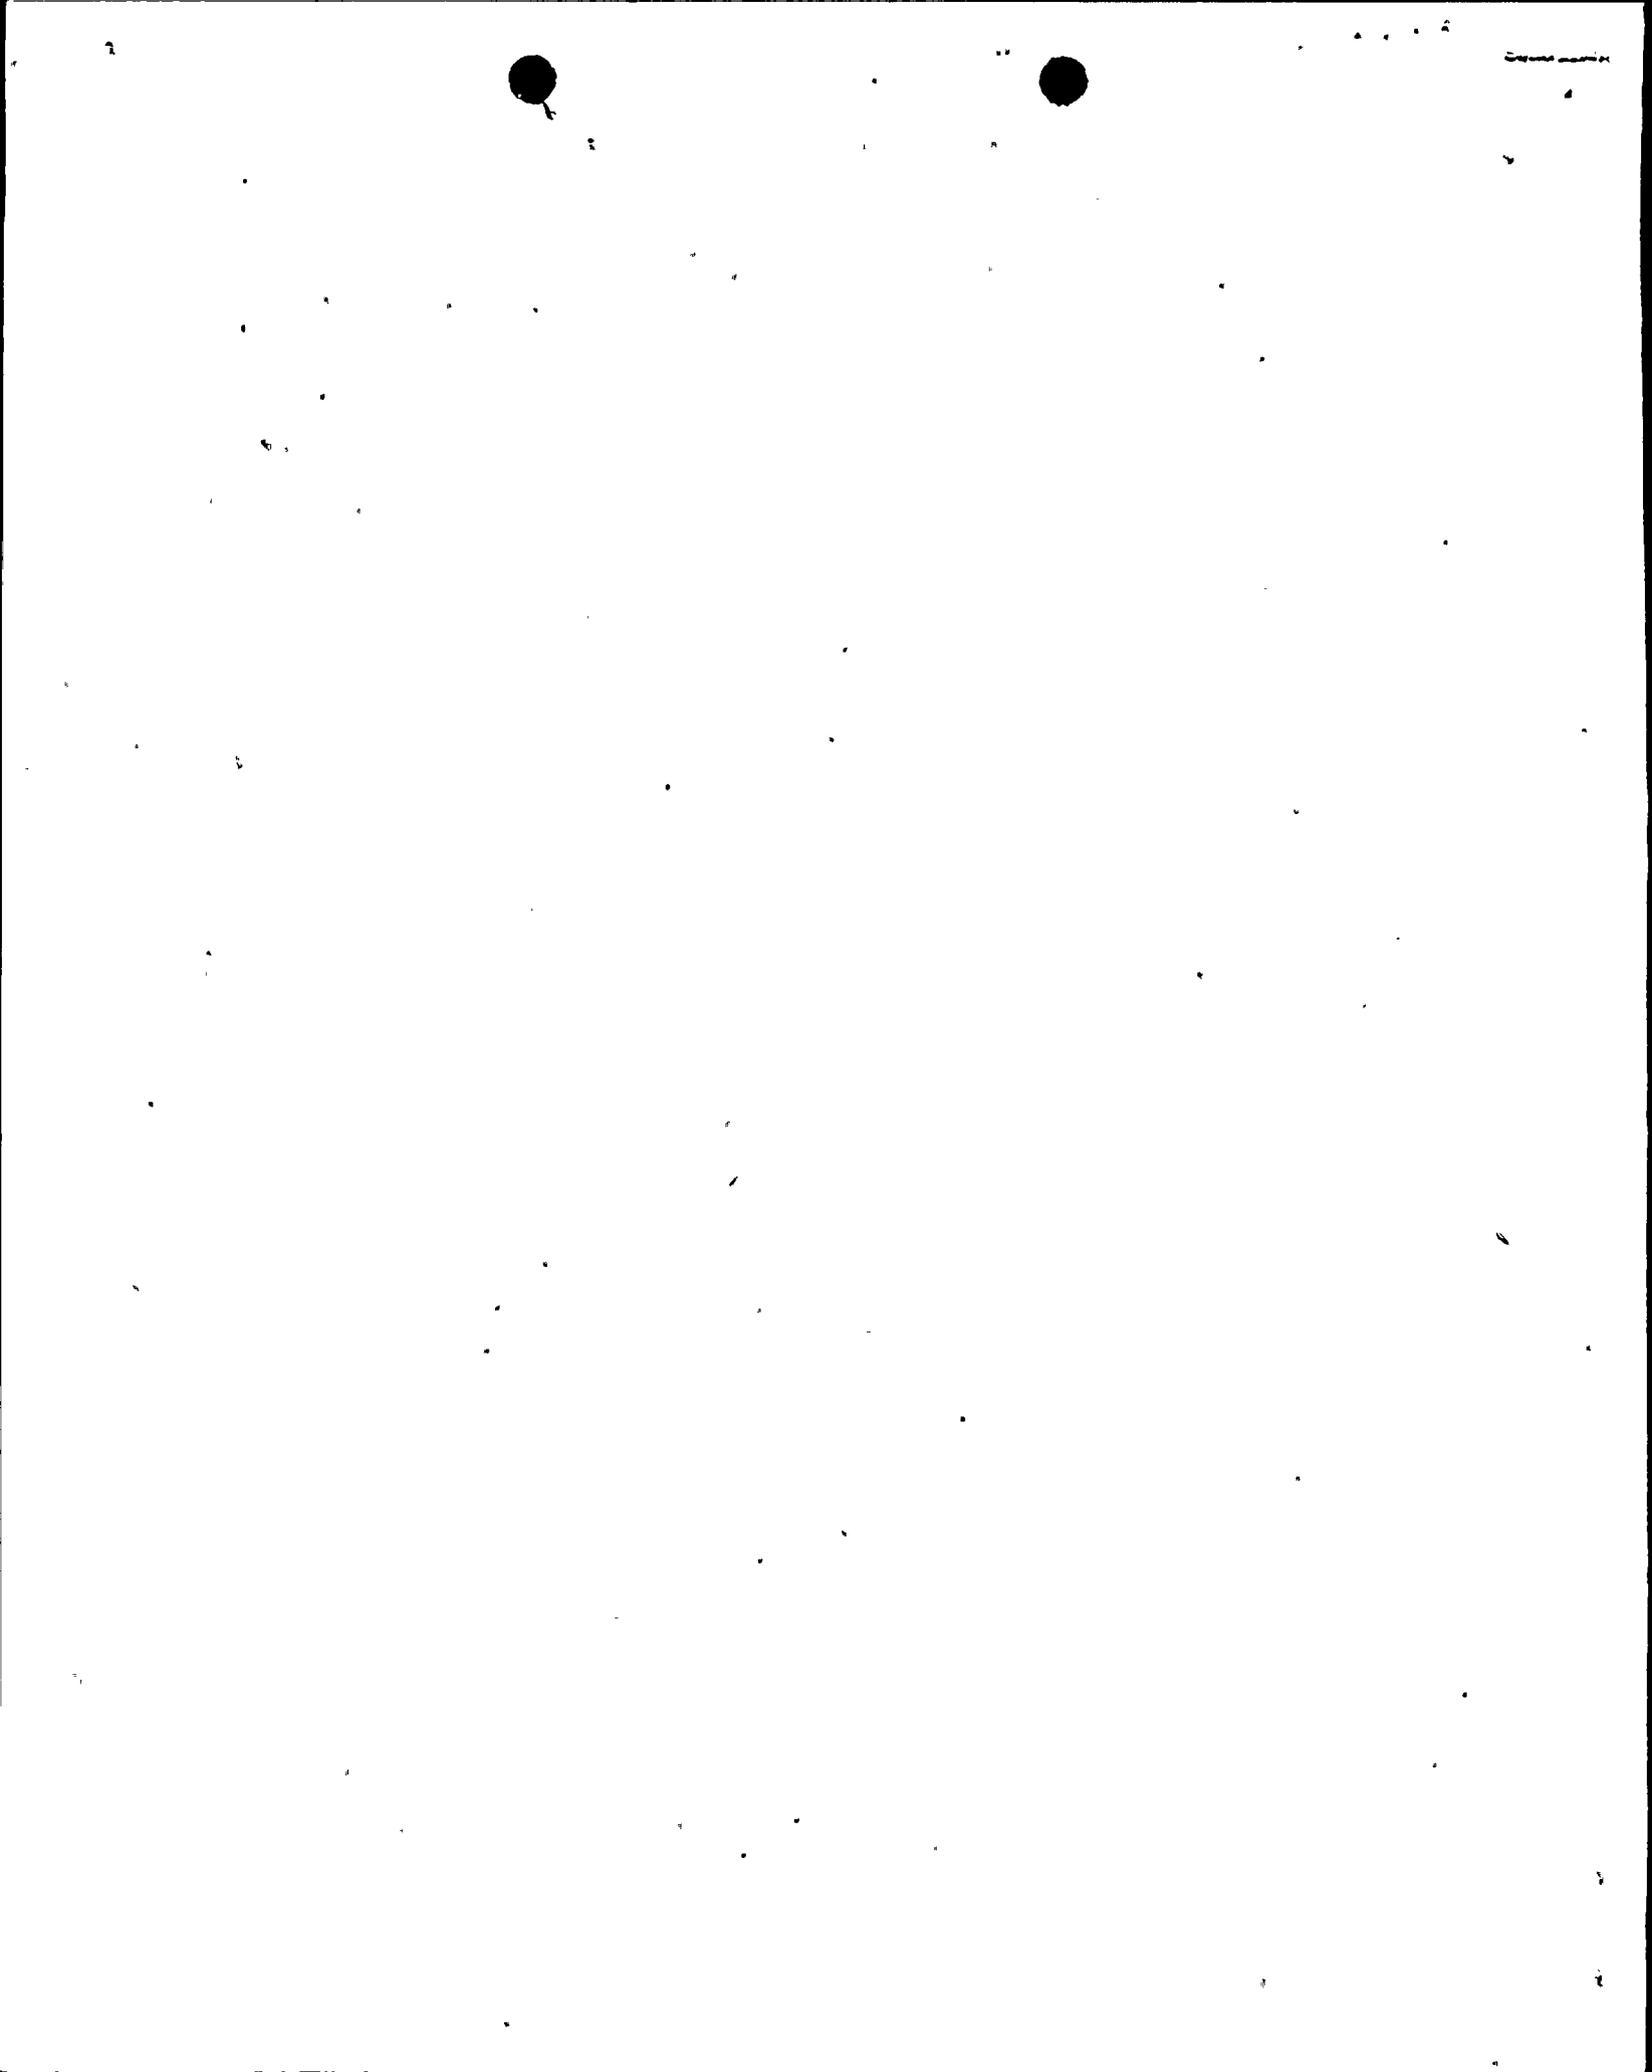

Truly,

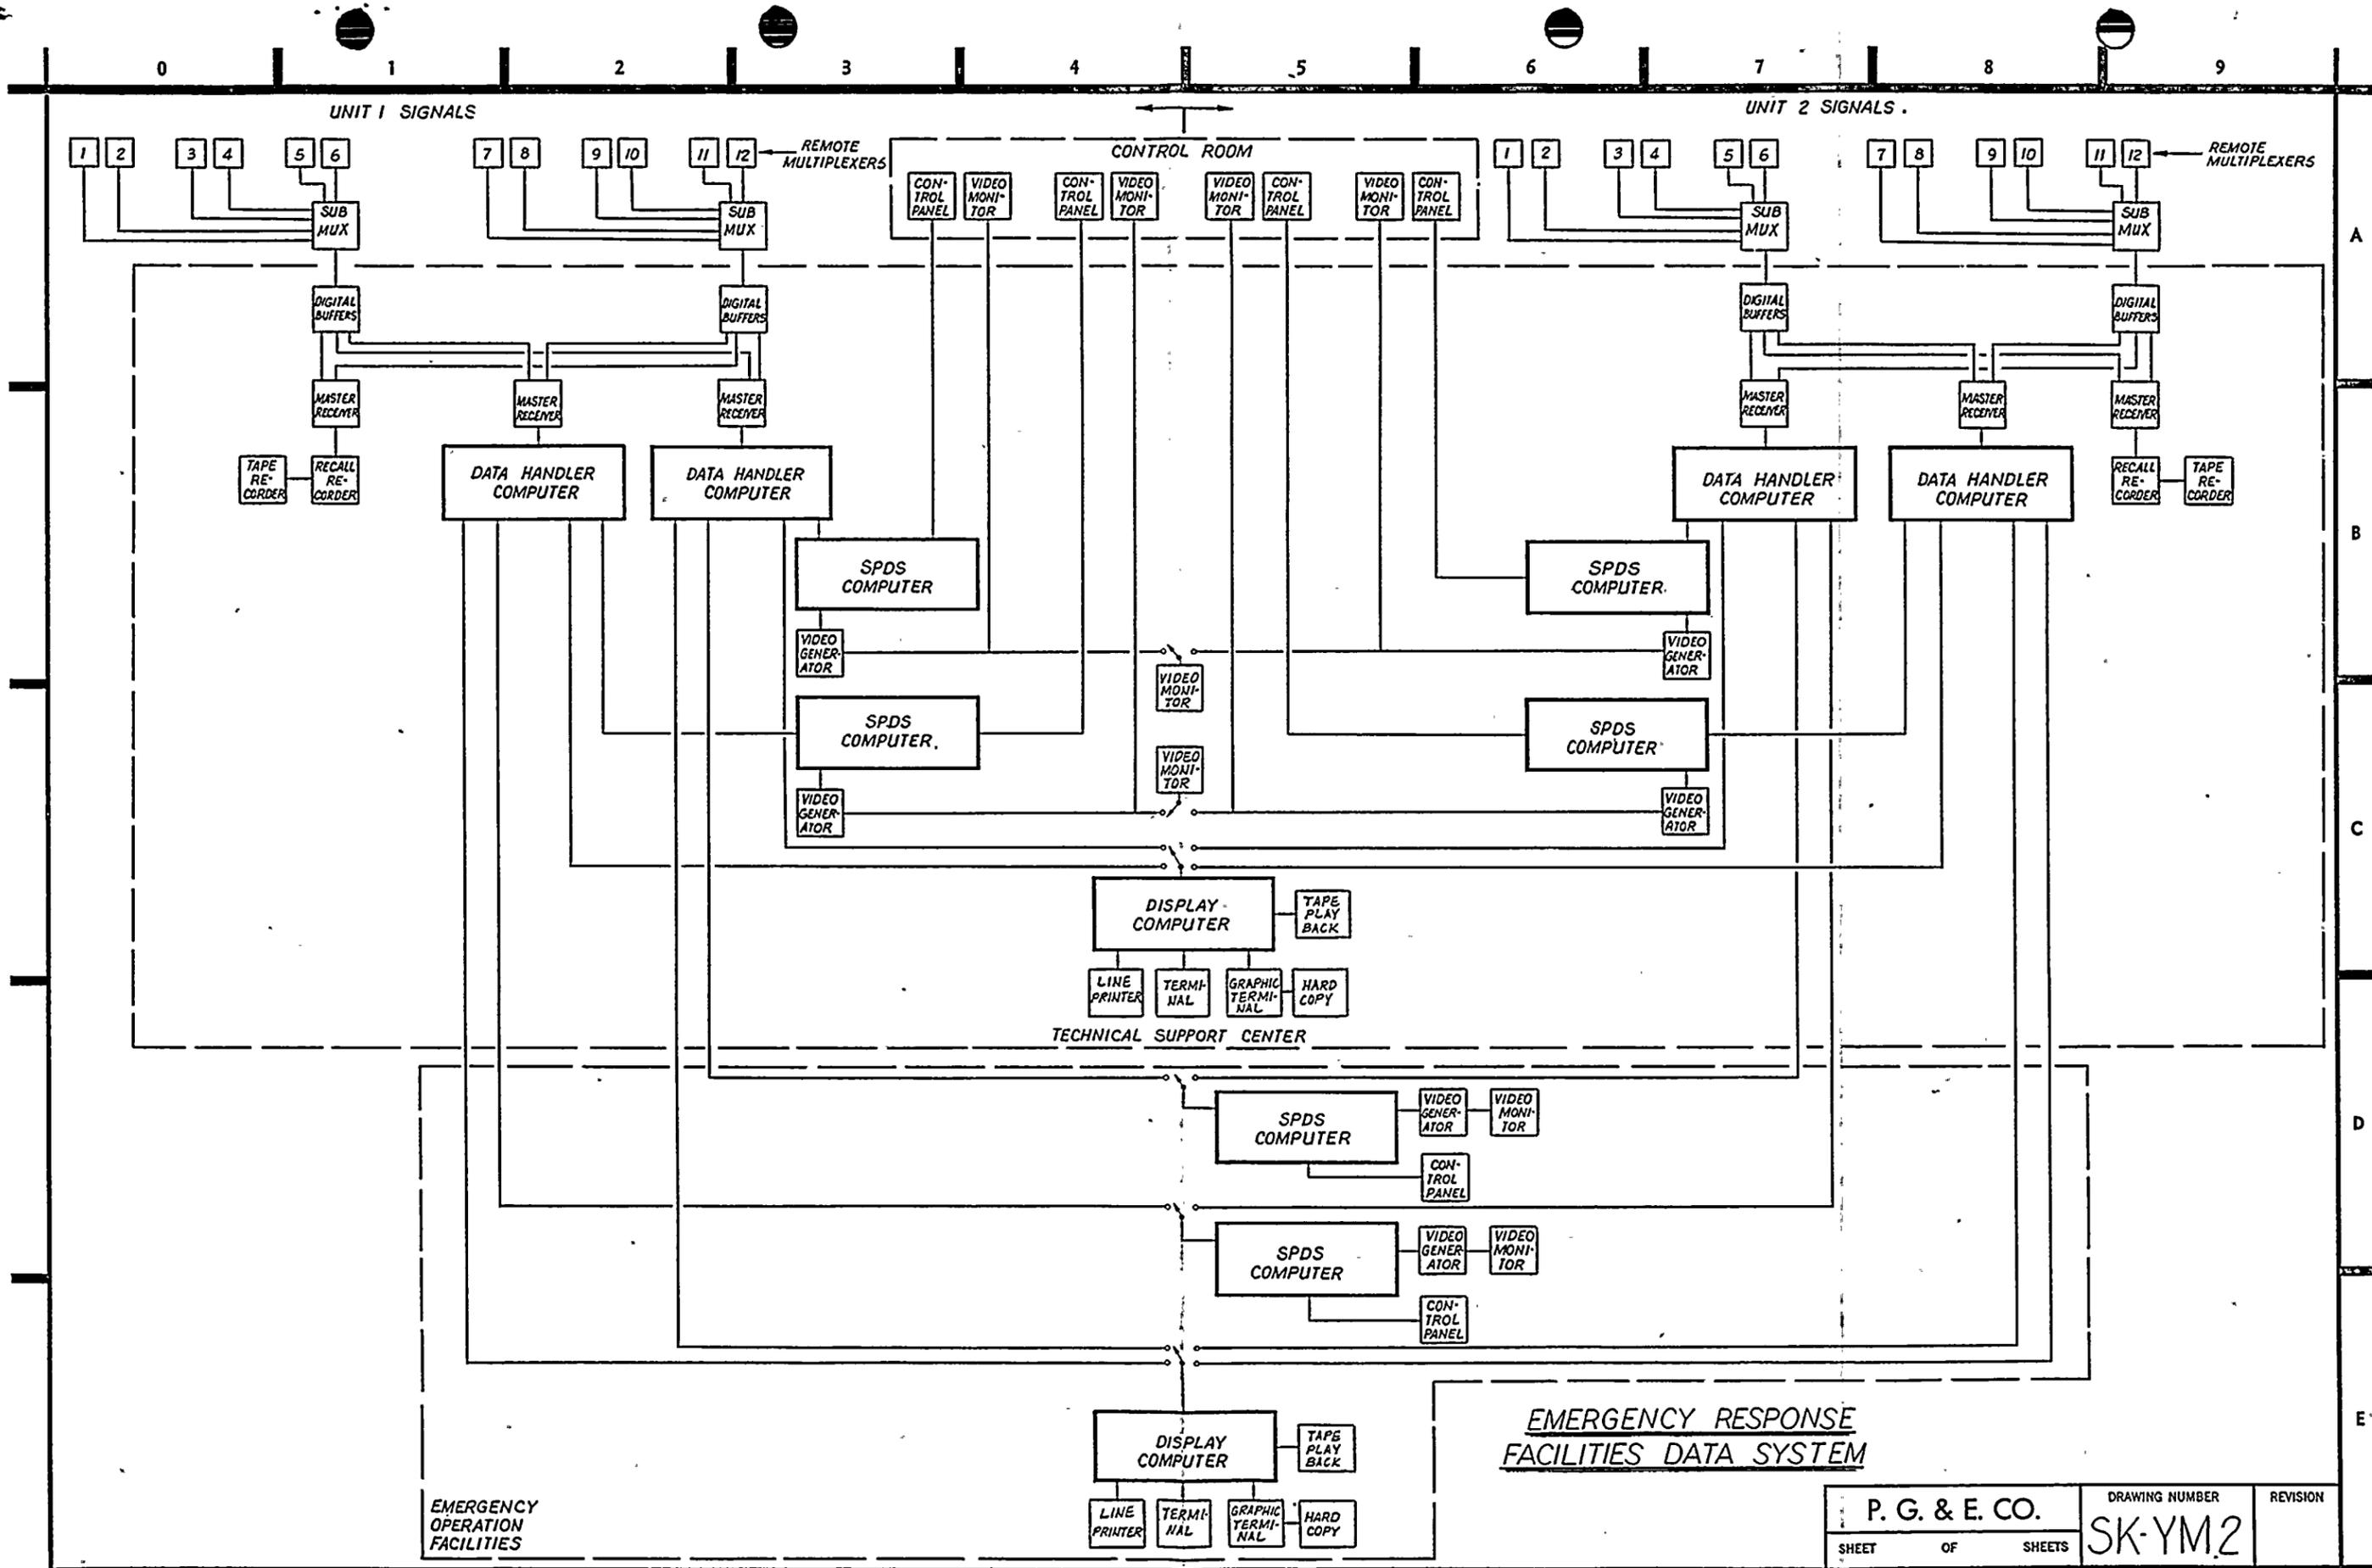

J. Waddell
Ranger-in-Charge/County Fire Chief

pal
