Re: Docket No. 50-275
Docket No. 50-323
Diablo Canyon Units 1 and 2

Dear Mr. Engelken:

The presence of an endangered species, the American peregrine falcon (Falco peregrinus anatum), has been observed in the vicinity of the Diablo Canyon Power Plant (DCPP). Two peregrine falcons, a male and a female, were first sighted on offshore rocks near DCPP in December 1980. More recent observations by the Santa Cruz Predatory Bird Research Group (SCPBRG) and PG&E biologists indicate the pair has established residence along the coast near DCPP. The observations have also revealed that the female falcon is immature, and therefore, the pair is not expected to nest in 1981.

To observe the birds on a continuing basis, we have funded a contract with the SCPBRG. In addition, PG&E biologists are also making periodic observations of the falcons' activities.
