Pacific Gas and Electric Company

Attention: Mr. J. D. Shiffer, Vice President  
Nuclear Power Generation

Gentlemen:

Subject: NRC Inspection of Diablo Canyon Units 1 and 2

This refers to a routine inspection, conducted by Messrs. M. M. Mendonca, M. L. Padovan, T. M. Ross, and T. J. Polich, of this office during the period of April 7, 1985, through May 25, 1985. This inspection examined your activities as authorized by NRC License Nos. DPR-80 and DPR-81. Discussions of our findings were held with Mr. R. C. Thornberry, and other members of your staff, at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on the results of this inspection, it appears that one of your activities was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. Your response to this notice is to be submitted in accordance with the provisions of 10 CFR 2.201 as stated in Appendix A, Notice of Violation.

Management attention is also invited to address those specific findings high-lighted in the exit section of this report. These findings represent several instances of marginal performance by the plant staff and appear to warrant broad scope corrective action. Additionally, a generic evaluation of the potential construction and operational implications to the finding of an RHR system weld crack (item 8 in the Exit section) should be provided to this office.

In accordance with 10 CFR 2.790 (a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
