

NOTICE OF VIOLATION

Pacific Gas and Electric Company
77 Beale Street
San Francisco, California 94106

Docket Nos. 50-275 and 50-323
License Nos. DPR-80 and DPR-82

As the result of the inspection conducted on December 30, 1985 - January 3, 1986, and in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C), the following violations were identified:

- A. Technical Specification 6.8.1 requires that procedures for implementation of the Emergency Plan shall be established, implemented and maintained. Table 1 of Procedure AP B-50, Emergency Planning Training, identifies the training/(annual) retraining requirements for site personnel who are to occupy positions in the licensee's emergency organization when activated. Procedure AP-B-252 defines annual to be no sooner than 10 months and no longer than 15 months. The licensee identifies personnel who have not taken a required refresher training course within the last 15 months as being delinquent.

Contrary to the above requirements, at the time of this inspection twenty five (25) of the 281 onsite personnel who have assignments in the site emergency organization had not completed annual refresher training in one or more of their required courses during the last 16 months. Three of the mentioned individuals were Shift Foreman, the individual who would become the Emergency Coordinator during an emergency.

This is a Severity Level IV Violation (Supplement VIII). This is a repeat violation.

- B. Technical Specification 6.8.1 states that written procedures for implementation of the Emergency Plan shall be established, implemented, and maintained. Emergency Plan Implementing Procedure EF-5 identifies the instrumentation and equipment to be maintained in the emergency kits and states that they are to be sealed to prevent tampering. According to EF-5 Kit Nos. 1-5 are to contain one air sampler each.

Contrary to the above, the required air sampler in Kit Nos. 4 and 5 was either missing or not operational. Also, these kits were not sealed to prevent unauthorized removal.

This is a Severity Level V Violation (Supplement VIII).
