Los Osos, Ca. 93402

Dear Nuclear Regulation Commissioners,

As a resident of San Luis Obispo County, I urge you not to allow PG&E to add more fuel<sup>rod</sup> disposal at the Diablo Canyon Nuclear Power plant the plant, with worker mistake, drop used at the workplace and being situated on the Hosgri fault, cannot withstand more stress without a major accident occurring.

Please show us that you are all not being paid for by PG&E to vote in favor of them time after time. Its time to start looking out for the people who live near Diablo Canyon who will not solely suffer the consequences.

Thank you.

Sally Rogow
