and 50-323-04

OFFICE
DOCKET

JUN 10 P3:14

Dear Sirs,

6-16-87

I'm strongly opposed to the high-density reracking at Diablo Canyon Nuclear Plant. A plan to store five times as much radioactive waste as the spent fuel pools were designed for is ludicrous, not to mention the active earthquake faults.

Many people I know are not necessarily environmentalists. They may not care about the endangered Kangaroo rat, or about off-shore oil drilling. Some are supportative of nuclear power, and some are not. But everyone I've talked with is opposed to reracking of nuclear waste at Diablo.

Start working for the health + safety of the public. Stop the reracking before it's too late. Reracking is only a quick solution to strengthen the strain.

Sincerely,

Gordon Long
