PGandE's "Market-Driven" Strategy

Gentlemen:

As requested by Mr. George Knighton of your staff, the following information is provided concerning the effect of Pacific Gas and Electric Company's "market-driven" strategy upon Diablo Canyon Nuclear Power Plant.

The essence of PGandE's market-driven strategy is to conduct its operations in a manner that will ensure that we remain the supplier of choice in the gas and electric markets which we serve. Toward this end, we have taken a number of steps which will improve our competitiveness and position PGandE to be a stronger, more efficient company, better able to meet the challenges of the future.

Our market-driven strategy includes, as one of its essential elements, the goal to operate our Diablo Canyon Nuclear Power Plant at the highest levels of safety and reliability. As such, we will continue our strong management and financial support of the plant and will make whatever expenditures are required to achieve this important goal. Our market-driven strategy has been formulated carefully to ensure our continued ability to meet all our corporate goals and remain a successful company.

Sincerely,

*G. A. Maneatis*
