Docket No. 50-323, OL-DPR-82  
Diablo Canyon Units 1 and 2  
License Amendment Request 87-09, Exemption to Technical  
Specification 3.8.1.1, Electrical Power Systems, A.C. Sources

Gentlemen:

Enclosed is an application for amendment to Facility Operating License Nos. DPR-80 and DPR-82. The enclosed License Amendment Request (LAR) proposes an exemption to Technical Specification 3.8.1.1. The exemption would allow diesel generator 1-3, the swing diesel generator, to be out of service for 14 days to perform the preventive maintenance and testing required by Surveillance Requirement 4.8.1.1.2b. during the Unit 1 second refueling outage. The Unit 1 second refueling outage is presently scheduled to begin in March 1988.

This LAR is similar to LAR 85-15, which proposed a 10 day allowed outage time for diesel generator 1-3 preventive maintenance and testing during the Unit 1 first refueling outage. The NRC approved this LAR by issuing License Amendment No. 9 for Unit 1 and License Amendment No. 7 for Unit 2.

Pursuant to 10 CFR 170.12(c), an application fee of \$150 is enclosed.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.
