Docket Nos. 50-275 and 50-323

Attention: Mr. J. D. Shiffer, Senior Vice President and General Manager
Nuclear Power Generation Business Unit

Gentlemen:

Subject: NRC Inspection of Diablo Canyon Units 1 and 2

This refers to a special inspection conducted by Mr. C. Myers during the period of April 17 through May 25, 1990 and of activities authorized by NRC License Nos. DPR-80 and DPR-82 and to the discussion of our findings held with Mr. B. Giffin and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. Your response to this notice is to be submitted in accordance with the provisions of 10 CFR 2.201 as stated in Appendix A, Notice of Violation. The violations involve failures to follow your procedures for identifying problems and obtaining corrective actions.

These findings indicate a need to improve your engineering involvement in the routine conduct of plant activities, particularly in the areas of motor operated valves, and maintaining an improved technical awareness and overview of maintenance activities and problems. In your response to the above violations, please discuss your corrective actions to provide an adequate technical evaluation for the testing and maintenance of MOVs to assure their design basis operability.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.
