Re: Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
Semiannual Radioactive Effluent Release Report

Gentlemen:

In accordance with 10 CFR 50.36a(2) and Section 6.9.1.6 of the Diablo Canyon Technical Specifications, PG&E is submitting the Diablo Canyon Power Plant Units 1 and 2 Semiannual Radioactive Effluent Release Report for the first half of 1990 (Enclosure 2). The report describes the quantities of radioactive gaseous and liquid effluents released from the plant over the period January 1, 1990 through June 30, 1990, and the solid radioactive waste shipments during the same period.

Corrected pages for the Semiannual Radioactive Effluent Release Report for the second half of 1989 (July 1 through December 31, 1989) are found in Enclosure 1. These changes are being provided because the Iron-55 (Fe-55) result which was reported to DCPD was later determined to be incorrect by the laboratory which performed the analysis. The previously reported value for Fe-55 was conservative; i.e., higher than actual, and these corrected pages (5) are to replace the corresponding pages in the previous report.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

A handwritten signature in cursive script, appearing to read 'L. F. Womack'.

L. F. Womack
