# Federal Emergency Management Agency

Washington, D.C. 20472

NOV 7 1990

Mr. Frank J. Congel, Director  
Division of Radiation Protection  
and Emergency Preparedness  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Congel:

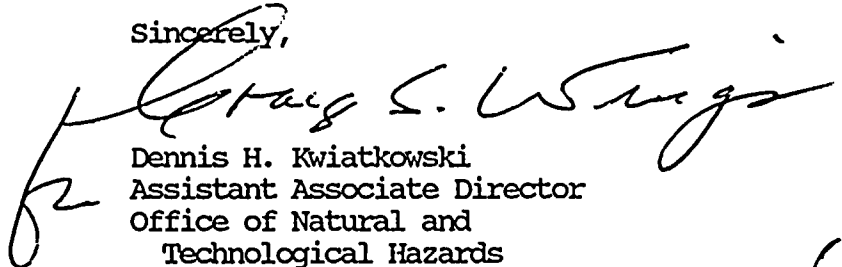

Enclosed is a copy of the final report for the September 13, 1989, exercise of the offsite radiological emergency response plans site-specific to the Diablo Canyon Nuclear Power Plant. San Luis Obispo County and the Pacific Gas and Electric Company participated fully in the exercise. The State of California, Santa Barbara County, and the California Polytechnic State University participated on a limited basis in the exercise. The exercise report, dated October 26, 1990, was prepared by Federal Emergency Management Agency (FEMA) Region IX staff.

There was one deficiency identified for San Luis Obispo County during the September 13, 1989 exercise. It cited inadequate Emergency Broadcast System messages. The County successfully re-demonstrated this objective at the remedial exercise on October 3, 1990. Fifteen Areas Requiring Corrective Action (ARCA) were identified during the September 13, 1989 exercise. FEMA Region IX staff have reviewed the required corrective actions with the State of California and San Luis Obispo County. FEMA Region IX will verify successful completion of the required corrective actions at the next biennial exercise, tentatively scheduled for October 1991.

Based on the results of the September 13, 1989, exercise and the October 3, 1990, remedial exercise, FEMA considers that there is reasonable assurance that the offsite radiological emergency response plans can be implemented, and that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the Diablo Canyon Nuclear Power Plant.

Should you have any questions concerning this report, please feel free to contact Craig S. Wingo, Chief, Technological Hazards Division, at (202) 646-3026.

Sincerely,

Dennis H. Kwiatkowski  
Assistant Associate Director  
Office of Natural and  
Technological Hazards
