Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
License Amendment Request 97-05: Revision of Technical Specification
3/4.7.3.1

Dear Commissioners and Staff:

Enclosed is an application for amendment to Facility Operating License Nos. DPR-80 and DPR-82. This license amendment request (LAR) proposes to revise Technical Specification (TS) 3/4.7.3.1, "Plant Systems - Vital Component Cooling Water System," to add new action statements and surveillance requirements for the component cooling water (CCW) surge tank pressurization system. CCW surge tank pressurization system requirements currently exist in an equipment control guideline, but are proposed for inclusion in TS because the CCW surge tank pressurization system is required to support licensing basis assumptions for a design basis loss-of-coolant accident.

This LAR includes a revision to TS Bases page B 3/4 7-10. That page was recently revised as discussed in PG&E letter DCL-97-083, dated May 7, 1997, and is the basis for the additional revision proposed in this LAR.

The changes proposed in this LAR are not required to address an immediate safety concern. PG&E requests that the NRC assign a medium priority for review and approval of this LAR.

PG&E requests that the TS changes become effective immediately upon issuance of the license amendment, to be implemented within 30 days from the date of issuance.
