General Comment

I oppose the WCS radioactive site because it is in a low-income area where people will not be able to reject it. Nuclear waste should not be stored near a major aquifer that is used throughout the Southwest for irrigation, drinking water and recreation. Nuclear waste should not be brought in on railroads that cross the United States-mobile chernobyls. WCS is taking advantage of the citizens that will be impacted by this radioactive site. I don't trust WCS to protect the public from their waste storage boondoggle.
