Michael Albanese, Corporate RSO
Qal-Tek Associates
3998 Commerce Circle
Idaho Falls, Idaho 83401

Dear Mr. Albanese:

Activities conducted under Arkansas Radioactive Materials Reciprocity License REC-330 were inspected by David Stephens of the Radioactive Materials Program, Arkansas Department of Health, on February 28, 2017. This inspection took place at McClelland Consulting Engineers, Inc., 1810 North College, Fayetteville, Arkansas, 72703. At the conclusion of the inspection, our findings were discussed with Cabel Bailey.

This inspection evaluated licensed activities as they relate to radiation safety compliance with the Arkansas State Board of Health Rules and Regulations for Control of Sources of Ionizing Radiation, and compliance with the conditions of the license. The evaluation consisted of selective examination of procedures and representative records, interviews with personnel, and observations of the inspector.

No Violations or Items of Noncompliance were identified during this inspection.

We appreciate the time and assistance provided by your staff during the review of your program. If you have any questions concerning this inspection or if we can be of assistance to you, please call this office at (501) 661-2173 or address correspondence to the address above. Please send any correspondence to the address above, including Slot 30.

Sincerely,

Jared Thompson, Program Manager
Radioactive Materials Program
