

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

MAR 24 2017

Greg Sackett, M.S., CHP
Radiation Safety Officer
Integrated Science Support, Inc.
14464 North 169 Hwy
Smithville, MO 64089

Dear Mr. Sackett:

Enclosed is Amendment No. 01 to your NRC Material License No. 24-35155-01 in accordance with your request. Please note that the license format was changed based on our new licensing process. In addition, we updated License Condition 12 regarding the authorized users and License Condition 13 regarding the licensed material possession limit based on the decommissioning financial assurance requirements. We also deleted License Condition 14 regarding the transportation requirement because this requirement is already specified in the regulations.

On January 23, 2017, we received your email to request a release of the facility located at 2027 North 36th Street, St. Joseph, Missouri for unrestricted use. In accordance with Title 10 Code of Federal Regulations Sections 30.32 and 30.38, the request must be signed by the licensee or a person duly authorized to act for and on his behalf. However, your request was not signed. Please resubmit the request with a proper signature.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to

develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
