Subject: SUMMARY OF TELECON HELD ON MARCH 28, 2017, BETWEEN THE NRC AND ENTERGY CONCERNING AN RAI PERTAINING TO THE WATERFORD STEAM ELECTRIC STATION, LICENSE RENEWAL APPLICATION
Attachments: Summary of Clarification Call - B.1.1-3a - March 28, 2017 - Enclosure.pdf

The U.S. Nuclear Regulatory Commission (NRC or the staff) and representatives of Entergy Operations, Inc. (Entergy) held a telecon on March 28, 2017, to discuss and clarify the staff's requests for additional information (RAIs) concerning the Waterford Steam Electric Station, license renewal application.

The telecon was useful in clarifying the intent of the staff's RAI regarding the Bolting Integrity Aging Management Program (AMP), specifically closure bolting where the piping systems contains air or gas for which leakage is difficult to detect. Waterford staff indicated that they understood the RAI and would provide an updated response.

Enclosure 1 provides a listing of the participants.

The applicant had an opportunity to comment on this summary.
