Division of Project Management
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Docket No. 50-275-OL
Docket No. 50-323-OL
Diablo Canyon Units 1 & 2

Dear Mr. Stolz:

The attached material dated June 6, 1978 supersedes our February 6, 1978 response to NRC fire protection review question 48 (dated December 9, 1977) and to questions 50, 51, and 53 (dated December 22, 1977). This material is provided in response to an informal request by the NRC Staff for additional information in these areas.

Included in this submittal is a tabulation of the safe shut-down equipment and/or electrical cabling that could be affected by a fire in each fire zone, and an evaluation of safe shutdown capability with a fire in any fire zone.

Revised fire zone drawings (Figures 3-1 through 3-20 in the Diablo Canyon Fire Protection Review) are included in this submittal. Five sets of the eleven color coded electrical cable routing drawings have been provided to the NRC Staff under separate cover. Limited distribution of these drawings was made due to the excessive time and effort required to manually color-code the drawings.

Very truly yours,

Philip A. Crane, Jr.
