To the Nuclear Regulatory Commission:

Waste Control Specialists' (WCS) application to store tons of irradiated nuclear fuel and high-level radioactive waste from nuclear reactors around the country in Andrews County, Texas, will cause thousands of unnecessary nuclear waste shipments across the US.

I urge you to include the risks of transporting toxic waste on our country's highways, railways and waterways.

If the license is approved, deadly waste would be transported through communities, farmland, sensitive natural areas and watersheds throughout the country for 24 years. 24 years. Twenty-four years.

Please say "no".

Sincerely,

Porter Hedge
