

JUN 27 1975

Docket Nos.: 50-275
and 50-323

Pacific Gas and Electric Company
ATTN: Frederick T. Searls
Vice President and General
Counsel
77 Beale Street
San Francisco, California 94106

Gentlemen:

In conjunction with the NRC environmental review of the Diablo Canyon Station, members of the staff desire to visit the site and the physical model basin in Richmond and to discuss with members of your staff the status of information that has been requested for the preparation of an Addendum to the Final Environmental Statement. I am therefore submitting a proposed schedule and agenda for such a visit for your consideration.

Mr. W. J. Ross, the staff's Environmental Project Manager, will visit the plant site and participate in all discussions. He will be accompanied at Richmond by three staff hydrologists - L. G. Hulman, M. L. Fliegel, and Roy Overstreet. Dr. John Bolen, a staff aquatic biologist, will attend the meetings in San Francisco and Richmond if his schedule permits. It is possible that some information acquired by the staff during this visit will require subsequent documentation as a supplement to your Diablo Canyon Environmental Report.

Monday, July 14 - Visit to the Diablo Canyon site

Wednesday, July 16 - Meeting with PG&E staff in San Francisco

1. Status of applicant's program and reports related to conditions of the construction permit (Unit 2)
 - a. Base-line monitoring programs
 - b. Impingement and entrainment
 - c. Chlorine usage
 - d. Ocean current
 - e. Physical model of discharge system
2. Status of review of environmental technical specifications *low (2)*

Pacific Gas and Electric Company 2

- 3. Briefing of activities associated with testing the condenser cooling water system
 - a. Copper corrosion
 - b. Titanium usage for condenser tubing
 - c. Schedule for future cold and hot pump tests
 - d. Status of plans to eliminate foam
 - e. Description of monitoring and analytical methods used for compliance with NPDES permit
- 4. Briefing on the status of schedules, tests, and operation permits
- 5. Updating of the following subjects covered at the C. P. stage
 - a. Transport of rock to the construction site
 - b. Results of removal of cofferdams
 - c. Redress and recovery of transmission corridors
 - d. Plans for transporting and processing spent fuel
 - e. System load capability, demand, and reserve

Thursday, July 17 - University of California model basin in Richmond

Briefing of the physical modeling program

- a. Review of objectives, approach, techniques and schedules
- b. Status of tests and results
- c. Relationship to dye tests at plant site
- d. Potential for design change to remedy foaming problems

Please notify me if these arrangements are unsuitable. Details can be worked out through telephone discussion between Mr. Ross and Mr. William Lindblad of your staff.

Sincerely,

Original signed by
Gordon K. Dicker
