

AUG 20 1975

Docket Nos.: 50-275, 50-323

Mr. E. C. Fullerton, Director  
Department of Fish and Game  
The Resources Building  
1416 Ninth Street  
Sacramento, California 95814 .

Dear Mr. Fullerton:

Messrs. W. J. Ross and L. G. Hulman of this staff have reported to me the subjects discussed with you and Mr. Lollock during your meeting of July 18, 1975. As you understand, we are trying to assess the potential impacts of the Diablo Canyon Nuclear Plant on the aquatic ecosystem of Diablo and South Coves and the adjacent coastal regions. The results of our current review are to be issued as an "Addendum" to the Final Environmental Statement that was issued by the AEC (then) in May 1973.

It is our understanding that your Department has been surveying the aquatic ecosystem around the plant site for many years and has observed definite changes in the benthic communities (especially abalone and urchins) during the last few years. Will you kindly furnish us a brief assessment of these changes in Diablo Cove and the adjacent coastal region and your evaluation of these areas as viable recreational or commercial fisheries for abalone and sea urchins. We would appreciate permission to include your reply as an appendix in our "Addendum" as a reference for our updating assessment.

Sincerely,

Original signed by  
Gordon K. Dicker  
Gordon K. Dicker, Chief  
Environmental Projects Branch 2  
Division of Reactor Licensing
